NOTICE OF HEARING ON PROPOSED
AMENDMENT OF FACILITY OPERATING LICENSE

(October 1, 1980)

On August 3, 1978, the United States Nuclear Regulatory Commission (the Commission) issued a notice of "Proposed Issuance of Amendments to Operating Licenses" relating to the above identified facilities (43 Fed. Reg. 35763 August 11, 1978). The proposed amendments would permit an increase in the storage capacity of the spent fuel pool at Dresden Station.

The State of Illinois submitted a petition to intervene, dated September 8, 1978 pursuant to Sections 2.714 and 2.715(c) of the Commission's Rules of Practice.

In a Notice of Hearing dated March 29, 1979, the Atomic Safety and Licensing Board, originally appointed to hear this matter, found that the State of Illinois' petition was "clearly sufficient to meet the requirements of both Sections 2.714 and

2.715(c) and accordingly, it granted the petition to intervene.

The Board as reconstituted under Section 2.721 of the Commission's Rules of Practice, as amended, (44 Fed. Reg. 45496, August 2, 1979) recognizes and reaffirms the granting of the State of Illinois' petition to intervene.
