

Dear Sir:

Mrs. David Deutch
R. # 1 Utica, Ill. 613
April 5th, 1979

Concerning nuclear power
have a few questions:

- 1.) Why, when there are only 70 nuclear power plants presently operating, are 7 of them in Illinois?
- 2.) Why is Morris, Ill. the major storage facility?
- 3.) Why are construction permits so easily obtainable?
- 4.) Why are so many power stations being built when only 70 supply our current needs?
- 5.) Why not spend the money used of nuclear technology on efficient use of coal, wind and/or solar energy — all of which are obviously abundant?

Please — prohibit the construction of further nuclear stations. Care about your country, its people — not money and big business for a change?

Sincerely,
Mrs. David Deutch
