Name: Muthana Al-Ghazi

General Comment

I am board certified medical physicist with thirty two years of experience.
I am providing comments in my professional capacity as an individual.
There is no need for rulemaking to change the current regulations regarding the release of patients under 10 CFR 35.
The existing regulations are adequately protective of public health while affording licensees the flexibility to provide customized and patient-centered care. Anecdotal evidence brought forth by some commenters regarding inadequate education and other practices that do not conform to the prevalent standard of care and best practices are best addressed through the licensing, guidance and inspection processes of the NRC and Agreement States.

Muthana Al-Ghazi, PhD, PPhys, FCCPM, DABR, DABMP, FAAPM
