Mr. Oliver D. Kingsley  
President Nuclear Generation Group  
Commonwealth Edison Company  
ATTN: Regulatory Services  
Executive Towers West III  
1400 Opus Place, Suite 500  
Downers Grove, IL 60515

SUBJECT: NRC INSPECTION REPORT 50-237/98012(DRS); 50-249/98012(DRS)

Dear Mr. Kingsley:

On April 27, 1998, the NRC completed an inspection at your Dresden Nuclear Power Station, Unit 2. The results of the inspection were discussed with Mr. Mike Heffley and other members of your staff on April 27, 1998. The enclosed report presents the results of this inspection.

The purpose of the inspection was to review the implementation of the inservice inspection program for the Dresden Unit 2 refueling outage 15. In addition, this inspection also reviewed activities associated with your installation of the emergency core cooling system suction strainers.

We concluded that, overall, the implementation of your inservice inspection program met ASME, Section XI requirements. The areas examined during the inspection are identified in the report. The inspection consisted of a selective examination of procedures and representative records, interviews with personnel, and observations of activities in progress.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning these inspections.

Sincerely,

original /s/ J. A. Grobe

John Grobe, Director  
Division of Reactor Safety
