

U.S. NUCLEAR REGULATORY COMMISSION

MATERIALS LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 37, 39, 40, 70 and 71, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Licensee				4. Expiration Date: July 31, 2027
1. WMU Homer Stryker M.D. School of Medicine				5. Docket No.: 030-39044 Reference No.:
2. 1000 Oakland Drive Kalamazoo, MI 49008-8000		3. License number: 21-35421-01		
6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form	8. Maximum amount that licensee may possess at any one time under this license		9. Authorized use
A. Hydrogen-3	A. Non-volatile	A. 80 millicuries total		A. For research and development as defined in 10 CFR 30.4, including in-vitro studies and teaching and training of students.
B. Carbon-14	B. Non-volatile	B. 90 millicuries total		B. For research and development as defined in 10 CFR 30.4, including in-vitro studies and teaching and training of students.
C. Phosphorus-32	C. Non-volatile	C. 50 millicuries total		C. For research and development as defined in 10 CFR 30.4, including in-vitro studies and teaching and training of students.
D. Phosphorus-33	D. Non-volatile	D. 70 millicuries total		D. For research and development as defined in 10 CFR 30.4, including in-vitro studies and teaching and training of students.

| 6. Byproduct, source, and/or special nuclear material | 7. Chemical and/or physical form | 8. Maximum amount that licensee may possess at any one time under this license | 9. Authorized use |
| E. Sulfur-35 | E. Non-volatile | E. 25 millicuries total | E. For research and development as defined in 10 CFR 30.4, including in-vitro studies and teaching and training of students. |
| F. Iodine-125 | F. Non-volatile | F. 5 millicuries total | F. For research and development as defined in 10 CFR 30.4, including in-vitro studies and teaching and training of students. |

CONDITIONS

10. Licensed material may be used or stored at the licensee's facilities located at:
- A. 300 Portage Street, Kalamazoo, Michigan, 49007
 - B. 4717 Campus Drive, Kalamazoo, Michigan, 49008
11. The Radiation Safety Officer (RSO) for this license is James F. Center.
12. Licensed material shall only be used by, or under the supervision of, the following individuals for the materials and use indicated:
- | <u>Authorized Users</u> | <u>Material and Use</u> |
|-------------------------------|--|
| Thomas Rothstein, M.D., Ph.D. | Hydrogen-3, phosphorus-32, phosphorus-33, and sulfur-35 |
| Benchang Guo, M.D., Ph.D. | Hydrogen-3, phosphorus-32, and phosphorus-33 |
| Nichol Holodick, M.D., Ph.D. | Hydrogen-3 |
| Beverly Murray, M.S. | Carbon-14, hydrogen-3, and sulfur-35 |
| William McDonald, B.S. | Carbon-14, hydrogen-3, iodine-125, phosphorus-32, phosphorus-33, and sulfur-35 |

13. The licensee shall not use licensed material in field applications where activity is released except as provided otherwise by specific condition of this license.
14. The licensee shall not use the licensed material in or on humans.
15. Before disposal as ordinary trash, the waste shall be surveyed at the container surface with the appropriate survey instrument set on its most sensitive scale and with no interposed shielding to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated, except for radiation labels on materials that are within containers and that will be managed as biomedical waste after they have been released from the licensee.
- A. Before disposal as ordinary trash, the waste shall be surveyed at the container surface with the appropriate survey instrument set on its most sensitive scale and with no interposed shielding to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated, except for radiation labels on materials that are within containers and that will be managed as biomedical waste after they have been released from the licensee.
- B. A record of each such disposal permitted under this license condition shall be retained for 3 years. The record must include the date of disposal, the date on which the byproduct material was placed in storage, the radionuclides disposed, the survey instrument used, the background dose rate, the dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.

16. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. This license condition applies only to those procedures that are required to be submitted in accordance with the regulations. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.

- A. Application dated April 3, 2017 (ML17100B052)
- B. Letter dated June 27, 2017 (ML17180A050)
- C. Letter dated July 6, 2017 (ML17187A218)
