**SUBJECT: ISSUANCE OF AMENDED REGISTRATION CERTIFICATES
NR-1112-S-101-S AND NR-1112-S-103-S**

Dear Dr. Kent:

Based on a letter from the State of Texas to the U.S. Nuclear Regulatory Commission dated February 14, 2017, and based on subsequent communication with you, the sealed sources included in registration certificate TX-1112-S-102-S have been transferred and combined with NR-1112-S-101-S. In addition we have completed our review of your request to update registration certificates NR-1112-S-101-S and NR-1112-S-103-S to make additional changes to the certificates. Copies of the amended registrations NR-1112-S-101-S and NR-1112-S-103-S are enclosed.

You must distribute the products in accordance with the statements and representations contained in your application, with enclosures thereto, and the information set out in your registration certificates. As a general rule, you must request and obtain an amendment to the certificate before you make changes or modifications to the information submitted to obtain the certificates.

Note that a certificate of registration, by itself, does not convey authorization for possession or distribution of radioactive sources or devices. A U.S. Nuclear Regulatory Commission or Agreement State license is required for possession and distribution of radioactive materials, sources, or devices.

Please read over the registration certificates in its entirety and notify us immediately of any errors or omissions.

You are obligated to notify us promptly in writing if you decide to no longer manufacture, distribute, or offer service support for the product.

T. Kent
