At a meeting held on January 17, 1980 at KMC representatives of NRC advised members of the SEP Owners Group that it would be very helpful if each SEP licensee provided a list of references for SEP Topics similar to that submitted by Commonwealth Edison (Attachment 1).

Representatives of the Owners Group recognized the value of such a list, however, it was noted to be a significant effort and some concern was expressed that at least part of the listing might not be used. Therefore, the group indicates a willingness to provide upon request such a list for specific topics on a case by case basis. Accordingly you are requested to provide references to docketed information relating to the following topics for which NRC staff will be performing the review:
