ATTACHMENT B - PROJECT DESCRIPTION

Program A: Nuclear and Radiological Engineering Scholarship Program at the Georgia Institute of Technology

Principal Investigator: [REDACTED]

1. Introduction

The enrollment in the NRE (undergraduate and graduate program) has doubled over the last eight academic years. This is a direct reflection of the recognition of the program’s quality, reputation, and vigorous recruitment activities, amplified by the growing demand for GT NRE students in the workforce. GT NRE graduates find employment with industry, academia and federal institutions (National Labs, NRC, DOE). In spite of the increased number of students, the program has maintained and strengthened the high standard used for selecting incoming students. In fall 2013, the enrollment of the NRE program is 234.

The objective of the proposed project is therefore to create a scholarship program to attract and retain outstanding students into the Nuclear and Radiological Engineering Program and train students for the need of the nuclear community including the Nuclear Regulatory Commission, national laboratories, and nuclear industry.

Proposed Scholarship Program

The Nuclear and Radiological Engineering program at Georgia Tech proposes to create a scholarship program that will consist of 10 two-year scholarships in the amount of [REDACTED] per student per year. The purpose of the proposed scholarship program is two-fold: to recruit top undecided engineering students (sophomores) into nuclear engineering and to retain the best students at the Georgia Tech NRE program.

To support a large number of students and ensure a diverse group of applications, two scholarship groups will be created. The first and primary scholarship group would focus on retaining top current NRE students. The focus of scholarships in the second group would be to recruiting highly qualified undecided engineering students at Georgia Tech into the NRE program.

Scholarship Group	Amount per year	Number of Scholarships
Sophomores and juniors in NRE program	[REDACTED]	7-9
undecided Students	[REDACTED]	1-3

Ultimately, the Chair of the NRE program will decide the distribution of the scholarships and amount of each scholarship as recommended by a committee of NRE faculty who review the applications based on academic qualifications with consideration given to financial need and when possible, promoting participation from minorities and women. Tuition rates vary depending on student's state residency and when they began their education at Georgia Tech. The proposed scholarships will cover tuition, mandatory student fees and books and supplies. The tuition, fees, books and supplies rates as determined by the Georgia Tech Bursars Office are listed in the Tuition and Fees section of the proposal. In no case will the scholarship award to an individual student exceed [REDACTED] per year.

In some cases, an applicant may decline the scholarship or the NRE program may discontinue a scholarship if the student does not maintain the minimum GPA requirement. Funds becoming available from these cases are then used to award new scholarships to outstanding students that are continuing in the NRE program at various levels (sophomores, juniors and seniors) and/or the undecided that change their major to NRE. These new awards have helped the program retain its outstanding students and recruit outstanding undecided engineering students into the program.

Recruitment Activities

The NRE program will use various methods in the effort to recruit a large and diverse group of students applying for the NRC scholarships. The typical recruiting method that has resulted in the increased program enrollment involves the distribution of a detailed information packet to prospective NRE students. This information packet includes the NRE annual report, NRE curricula, scholarship, Co-op/internship, undergraduate research, and student professional group information. An information sheet dedicated to the NRC scholarship program will be included in distributed information. Students already enrolled in the NRE program will be encouraged to apply for the scholarship via e-mail and by the individual faculty members teaching the NRE courses.

To attract a larger pool of applicants the details of the scholarship program will be given to undecided engineering majors at Georgia Tech to encourage them to pursue a NRE degree. Additionally, the NRE program will work with the College of Engineering's successful Women in Engineering program and the Georgia Tech chapter of the National Society of Black Engineers to distribute information on the NRC scholarship program.

For students participating in either the dual degree engineering program (DDEP) or the regent's engineering transfer program (RTEP) the program coordinators at each college will be contact and sent information regarding the NRE program and the NRC scholarships. These program coordinators will be asked to distribute the information to their students enrolled at their colleges.

Selection Process

Scholarship applicants will be asked to provide;

- Application form
- An essay on a current topic in the nuclear and radiological engineering industry
- Academic transcripts
- Reference letters

A committee of NRE faculty will review the applications and provide a ranking of the applicants to the Chair of the NRE program. The Chair will select scholarship candidates based on the committee recommendations. The review committee will use the following criteria in their selection process;

- Overall Academic record
- Essay
- Letters of recommendation
- Progress toward graduation
- Financial need

When possible this scholarship will be used to increase participation of qualified minorities and women.

Scholarship Program Administration

The NRC scholarship program will be jointly administered by the NRE program office and the Woodruff School Finance Office and Office of Student Services as well as the Georgia Tech Financial Aid Office. The NRE program office will receive and evaluate the applications and make the scholarship awards. The financial office will establish and manage the scholarship funds and disburse the scholarship awards to the applicants. The Woodruff School Office of Student Services will maintain the academic records of the recipients and assist in monitoring the progress of the students.

Each scholarship recipient will use the dual advising system the NRE program has developed to ensure success of the student. In this system the student has an academic advisor and is assigned an NRE faculty advisor. The academic advisor advises and assists the student on curriculum matters and course scheduling, monitors student progress, and other student related matters. The faculty advisor assists the student in career options and the determination of technical electives to match the student's interests. In the case the scholarship recipient is transfer student from another Georgia Tech degree program, from the DDEP, or in the RTEP then the Principal Investigator will be assigned as the student's advisor. The academic advisor will have the responsibility to track the awardees' progress.

Evaluation Plan

The academic advisor will review the grades of the recipients to ensure that they meet the 3.0 GPA requirement overall and within in NRE program. If a student's overall or NRE program GPA drops below 3.0 then the scholarship support will be dropped. The academic advisor will also review the academic progress of each student and the students' course schedule to confirm the minimum number of credit hours (12) for the next semester. Additionally, the academic advisor will monitor the scholarship recipient to confirm that the student is making progress towards their degree.

Evaluation of the NRC scholarship program will be tracked by maintaining key statistics from the applications. These key statistics will include the number of applications, gender, ethnicity, and the GPA of the applicants. The NRE program will also keep the statistics for the overall program including total enrollment, the number of incoming freshman, incoming freshman GPA and SAT scores, percentages of minorities and the number of students entering the program through the DDEP and RTEP. These numbers will be updated on a yearly basis to evaluate the success of the scholarship program and will be reported to the NRC in the appropriate reports.

Program B: Nuclear and Radiological Engineering Scholarship Program at the Georgia Institute of Technology

Principal Investigator: [REDACTED]

Project Description

1. Introduction

The enrollment in the NRE (undergraduate and graduate program) has had an average enrollment of 221 students over the last 5 years (2012-2016). This is a direct reflection of the recognition of the program’s quality, reputation, and recruitment activities. GT NRE graduates find employment with industry, academia and federal institutions (National Labs, NRC, DOE).

The objective of the proposed project is therefore to provide a scholarship program to attract and retain outstanding students into the Nuclear and Radiological Engineering Program and train students for the need of the nuclear community including the Nuclear Regulatory Commission, national laboratories, and nuclear industry.

Ultimately, the Chair of the NRE program will decide the distribution of the scholarships and amount of each scholarship as recommended by a committee of NRE faculty who review the applications based on academic qualifications with consideration given to financial need. Tuition rates vary depending on student’s state residency and can change from year-to-year even for in-state residents. The proposed scholarships will be applied by the students to tuition, mandatory student fees and books and supplies. The total cost of tuition, fees, books and supplies costs as reported by the Georgia Tech Bursars Office and are listed in the Tuition and Fees section of the proposal. In no case will the scholarship award to an individual student exceed \$10,000 per year.

In some cases, an applicant may decline the scholarship or the NRE program may discontinue a scholarship if the student does not maintain the minimum GPA requirement. Funds becoming available from these cases are then used to award new scholarships to outstanding students that are continuing in the NRE program at various levels (sophomores, juniors and seniors) and/or the

Certifications and Representations: These terms incorporate the certifications and representations required by statute, executive order, or regulation that were submitted with the SF424B application through [GRANTS.GOV](https://www.grants.gov).

I. Mandatory General Requirements

The order of these requirements does not make one requirement more important than any other requirement.

1. Applicability of 2 CFR Part 200

All provisions of 2 CFR Part 200 and all Standard Provisions attached to this grant/cooperative agreement are applicable to the Recipient and to sub-recipients which meet the definition of "Recipient" in 2 Part [§200.86](#), unless a section specifically excludes a sub-recipient from coverage. The Recipient and any sub-recipients must, in addition to the assurances made as part of the application, comply and require each of its sub-awardees employed in the completion of the project to comply with [Subpart D](#) of [2 CFR Part 200](#) and include this term in lower-tier (sub-award) covered transactions.

The Recipient is obligated to conduct project oversight as may be appropriate, to manage the funds with prudence, and to comply with the provisions outlined in [2 CFR Part 200](#). Within this framework, the Principal Investigator (PI) named on the award face page, is responsible for the scientific or technical direction of the project and for preparation of the project performance reports. This award is funded on a cost-reimbursement basis, not to exceed the amount awarded as indicated on the face page, and is subject to a refund of unexpended grant funds to the NRC.

The non-Federal entity alone must be responsible, in accordance with good administrative practice and sound business judgment, for the settlement of all contractual and administrative issues arising out of procurements related to its grant award. These issues include, but are not limited to, source evaluation, protests, disputes, and claims. These standards do not relieve the non-Federal entity of any financial or fiduciary responsibilities or obligations arising under its grant, including sub-contracts and sub-awards, or any other contractual or financial obligation. The Federal awarding agency will not substitute its judgment for that of the non-Federal entity unless the matter is primarily a Federal concern. Violations of law will be referred to the local, State, or Federal authority having proper jurisdiction. See [2 CFR § 200.318\(k\)](#), General Procurement Standards.

FEDERAL FINANCIAL REPORTS

Federal Financial Reports (SF-425) are semi-annually, for the periods ending March 31 and September 30. Reports are due within 30 calendar days following the end of the reporting period and must be emailed to the Project Officer at the email addressed indicated in the Notice of Award, and to the Grants Officer at:

Grants_FFR.Resource@nrc.gov. (NOTE: There is an underscore between Grants and FFR in the email address.) The SF-425 form and instructions are available at the following URL: http://www.whitehouse.gov/omb/grants_forms/.

PERFORMANCE PROGRESS REPORTS

The performance (technical) reports indicated below are subject to [2 CFR §200.328](#).

Scholarship Programs

Performance Progress reports must be submitted annually, for the period ending September 30, or any portion thereof, regardless of the award date. Reports are due within 30 days following the end of each reporting period and must be emailed to the Project Officer at the email addressed indicated in the Notice of Award, and to the Grants Officer at: Grants_PPR.Resource@nrc.gov. (NOTE: There is an underscore between Grants and PPR in the email address.)

Final Reports - The Recipient is required to submit final reports, both Financial (SF-425) and Performance (SF-PPR, SF-PPR-B, SF-PPR-E) within 90 days of the grant expiration. In addition to these reports, a final SF-428, Tangible property report, is also required, if applicable. The final PPR (for Scholarship, Fellowship, and Trade School and Community College Scholarship awards) must include the names of all students with up to date contact information (mailing address, telephone/cell phone, email address). The reports must be emailed to the Project Officer at the email addressed indicated in the Notice of Award, and to the Grants Officer at: Grants_FFR.Resource@nrc.gov and Grants_PPR.Resource@nrc.gov. (NOTE: There is an underscore between Grants and FFR and Grants and PPR in the email addresses.)

For grant awards that are modified to add additional Program Descriptions, the recipient is required to address the applicable grant performance metrics associated with all programs. Further, these metrics should be broken out by individual program (e.g. Program A and Program B). This can be done utilizing Block 10, Performance Narrative, of the SF-PPR form. If this block does not have sufficient space, additional pages will be accepted. Sf-PPR-B and SF-PPR-E should be used to address both programs as well.

Period of Performance – 2 CFR § 200.309

The recipient may charge to the Federal award only allowable costs incurred during the period of performance and any costs incurred before the NRC or pass-through entity made the Federal award that was authorized by the NRC or pass through entity.

Unless otherwise authorized in [2 CFR Part 200](#) or by special award condition, any extension of the award period can only be authorized by the Grants Officer in writing. Assurances of funding from other than the Grants Officer shall not constitute authority to obligate funds for programmatic activities beyond the expiration date.

The NRC Grant Officer may authorize a no cost extension of the period of performance. The recipient must submit a no cost extension request no less than 30 days prior to the award end date. Any request for a no cost extension after the grant has expired will not be approved. However, the NRC has no obligation to provide any additional prospective or incremental funding. Any modification of the award to increase funding and/or to extend the period of performance is at the sole discretion of the NRC.

Automated Standard Application For Payments (ASAP) Procedures

Unless otherwise stated, Recipient payments are made using the Department of Treasury's Automated Standard Application for Payment (ASAP) system, ASAP.gov, through preauthorized electronic funds transfers. To receive payments, Recipients are required to enroll with the Department of Treasury, Financial Management Service, and Regional Financial Centers, which allows them to use the on-line method of withdrawing funds from their ASAP established accounts. The following information is required to make ASAP withdrawals: (1) ASAP account number – the award number found on the cover sheet of the award; (2) Agency Location Code (ALC) – 31000001; and Region Code. Recipients enrolled in the ASAP system do not need to submit a "Request for Advance or Reimbursement" (SF-270).

II. Audit Requirements

Audits

Organization-wide or program-specific audits are performed in accordance with the Single Audit Act of 1996, as amended, and as implemented by [2 CFR Part 200, Subpart F—AUDIT REQUIREMENTS](#). Recipients are subject to the provisions of this subpart if they expend \$750,000 or more in a year in Federal awards. See [2 CFR 200.501](#).

The Form SF-SAC and the Single Audit Reporting packages for fiscal periods ending on or after January 1, 2008 are submitted online, as follows:

<http://harvester.census.gov/fac/collect/ddeindex.html>;
2. Complete the Form SF-SAC;
3. Upload the Single Audit;
4. Certify the Submission; and
5. Click "Submit."

Organizations expending less than \$750,000 a year are not required to have an annual audit for that year but must make their grant-related records available to NRC or other designated officials for review or audit.

III. Programmatic Requirements

The recipient is responsible for providing documentation to the NRC that tracks each student's progress in achievement of the academic program for which federal funds were provided. This includes: (1) ensuring the service agreement is signed by the student prior to providing support; (2) providing the NRC with student contact information upon student entry into the program, upon completion or withdrawal from the program, and upon request by the NRC; and (3) monitoring the student's fulfillment of the service agreement for the duration of the award. The

NRC shall be notified immediately if a student is not fulfilling the academic program or the service agreement.

Grant Performance Metrics

The Office of Management and Budget requires all Federal Agencies providing funding for educational scholarships and fellowships as well as other educational related funding to report on specific metrics. These metrics are part of the Academic Competitiveness Council's (ACC) 2007 report and specifically relates to Science, Technology, Engineering, and Mathematics (STEM) curricula.

As part of the OMB requirements indicated above (for metric reporting), the recipient shall address the following questions and submit responses with the required progress reports:

Scholarship Metrics:

 - a. Response is the number of students, for this reporting period and cumulative to the grant.

1. Student Name
2. Years of Support
3. Cumulative Support in Dollars
4. Estimated Graduation Date
5. Status
6. Up to date student contact information (mailing address, telephone/cell phone, email address) for students no longer participating in the program, i.e. transferred programs, graduated, withdrew, etc.
7. Up to date student contact information, for all students at time of grant expiration, i.e. Final PPR.

Examples of status could be:

“Employed in Nuclear Industry”, if so, where;

“Looking for employment”, if so, how long;

“Deferred due to continuing education”, if so, what degree;

“Employed by Non-Nuclear”, if so, where; and

“Dropped out of program”

Unsatisfactory Performance

Failure to perform the work in accordance with the terms of the award and maintain at least a satisfactory performance rating may result in designation of the Recipient as high risk and the assignment of special award conditions. Further action may be required as specified in the standard term and condition entitled “Remedies for Noncompliance.”

Failure to comply with the award provisions may result in a negative impact on future NRC funding. In addition, the Grants Officer may withhold payments; change the method of payment from advance to reimbursement; impose special award conditions; suspend or terminate the grant.

Other Federal Awards With Similar Programmatic Activities

The Recipient will immediately notify the Project Officer and the Grants Officer in writing if after award, other financial assistance is received to support or fund any portion of the program description stated in the NRC award. NRC will not pay for costs that are funded by other sources.

Prohibition Against Assignment By The Recipient

The Recipient will not transfer, pledge, mortgage, or otherwise assign the award, or any interest to the award, or any claim arising under the award, to any party, banks, trust companies, or other financing or financial institutions without the written approval of the Grants Officer.

Site Visits

The NRC, through authorized representatives, has the right to make site visits to review project accomplishments and management control systems and to provide technical assistance as required. If any site visit is made by the NRC on the premises of the Recipient or contractor under an award, the Recipient shall provide and shall require his/her contractors to provide reasonable access to all facilities and provide necessary assistance for the safety and convenience of the Government representative in the performance of his/her official duties.

IV. Additional Requirements

Criminal and Prohibited Activities

The Program Fraud Civil Remedies Act ([31 U.S.C. §§ 3801-3812](#)), provides for the imposition of civil penalties against persons who make false, fictitious, or fraudulent claims to the Federal government for money (including money representing grant/cooperative agreements, loans, or other benefits).

False statements ([18 U.S.C. § 287](#)), provides that whoever makes or presents any false, fictitious, or fraudulent statements, representations, or claims against the United States shall be subject to imprisonment of not more than five years and shall be subject to a fine in the amount provided by 18 USC §287.

False Claims Act ([31 U.S.C. § 3729 et seq.](#)), provides that suits under this Act can be brought by the government, or a person on behalf of the government, for false claims under federal assistance programs.

Copeland “Anti-Kickback” Act ([18 U.S.C. § 874](#)), prohibits a person or organization engaged in a federally supported project from enticing an employee working on the project from giving up a part of his compensation under an employment contract.

American-Made Equipment and Products

Recipients are encouraged to purchase American-made equipment and products with funding provided under this award.

Increasing Seat Belt Use in the United States

E.O. 13043, amended by E.O. 13652, requires Recipients to encourage employees and contractors to enforce on-the-job seat belt policies and programs when operating company-owned, rented or personally-owned vehicle.

Federal Leadership of Reducing Text Messaging While Driving

E.O. 13513 requires Recipients to encourage employees, sub-awardees, and contractors to adopt and enforce policies that ban text messaging while driving company-owned, rented vehicles or privately owned vehicles when on official Government business or when performing any work for or on behalf of the Federal Government.

Federal Employee Expenses

Federal agencies are barred from accepting funds from a Recipient to pay transportation, travel, or other expenses for any Federal employee unless specifically approved in the terms of the award. Use of award funds (Federal or non-Federal) or the Recipient’s provision of in-kind goods or services, for the purposes of transportation, travel, or any other expenses for any Federal employee may raise appropriation augmentation issues. In addition, NRC policy prohibits the acceptance of gifts, including travel payments for Federal employees, from Recipients or applicants regardless of the source.

Minority Serving Institutions (MSIs) Initiative

Pursuant to E.O.s 13230 and 13270, [amended by E.O. 13316](#) and [13385](#), 13532, 13592, 13555, 13515, and 13621, NRC is strongly committed to broadening the participation of MSIs in its financial assistance program. NRC’s goals include achieving full participation of MSIs in order to advance the development of human potential, strengthen the Nation’s capacity to provide high-quality education, and increase opportunities for MSIs to participate in and benefit from Federal financial assistance programs. NRC encourages all applicants and Recipients to include meaningful participations of MSIs. Institutions eligible to be considered MSIs are listed on the Department of Education website: <http://www.ed.gov/about/offices/list/ocr/edlite-minorityinst.html>

Research Misconduct

Scientific or research misconduct refers to the fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results. It does not include honest errors or differences of opinions. The Recipient organization has the primary responsibility to investigate allegations and provide reports to the Federal Government. Funds expended on an activity that is determined to be invalid or unreliable because of scientific misconduct may result in a disallowance of costs for which the institution may be liable for

repayment to the awarding agency. The Office of Science and Technology Policy at the White House published in the Federal Register on December 6, 2000, a final policy that addressed research misconduct. The policy was developed by the National Science and Technology Council ([65 FR 76260](#)). The NRC requires that any allegation be submitted to the Grants Officer, who will also notify the OIG of such allegation. Generally, the Recipient organization shall investigate the allegation and submit its findings to the Grants Officer. The NRC may accept the Recipient's findings or proceed with its own investigation. The Grants Officer shall inform the Recipient of the NRC's final determination.

Publications, Videos, and Acknowledgment of Sponsorship

Publication of the results or findings of a research project in appropriate professional journals and production of video or other media is encouraged as an important method of recording and reporting scientific information. It is also a constructive means to expand access to federally funded research. The Recipient is required to submit a copy to the NRC and when releasing information related to a funded project include a statement that the project or effort undertaken was or is sponsored by the NRC. The Recipient is also responsible for assuring that every publication of material (including Internet sites and videos) based on or developed under an award, except scientific articles or papers appearing in scientific, technical or professional journals, contains the following disclaimer:

“This **[report/video]** was prepared by **[Recipient name]** under award **[number]** from **[name of operating unit]**, Nuclear Regulatory Commission. The statements, findings, conclusions, and recommendations are those of the author(s) and do not necessarily reflect the view of the **[name of operating unit]** or the US Nuclear Regulatory Commission.”
