### EVENT DESCRIPTION AND PROBABLE CONSEQUENCES ⑩

② During normal operation, 2C main steam line rad monitor caused RPS channel "A" half-scam. Monitor did not alarm and half-scam couldn't be reset. Down scale signal inserted to reset half-scam. Safety significance minimal since redundant systems were operable, monitor failed in tripped direction, and safety systems functioned as designed. This particular event the first of its type.

### CAUSE DESCRIPTION AND CORRECTIVE ACTIONS ⑳

⑩ Failure of the monitor was caused by a bad relay. Defective component was replaced on a like-for-like basis. Because of the redundancy of the monitors and the operability of the safety systems, no further corrective action is deemed necessary.
