Mr. Dennis L. Crutchfield
Operating Reactors Branch #2
Division of Operating Reactors
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Dresden 2 Reactor-Turbine Building
Design Parameter Verification
Docket No. 50-237

Reference: March 4, 1980 letter from Robert F. Janecek
to Dennis L. Ziemann

Dear Mr. Crutchfield:

In the referenced letter Commonwealth Edison stated the requested Reactor-Turbine building design parameters would be evaluated and submitted for staff review by June 1, 1980. During the course of this review we have had difficulties in obtaining all the required information on as installed equipment weights and in reviewing the final as-built drawings. Work is proceeding on the design vs as-built verification. We currently project July 11 the date for completion of the verification process.

The findings of the evaluation will be transmitted to the NRC in a brief letter report by July 15, 1980. We are willing to discuss the exact status of this work with your staff via a conference call at your convenience.

One (1) signed original and thirty-nine (39) copies of this transmittal are provided for your use.

Very truly yours,

Robert F. Janecek
