Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: Dresden Station Units 2 and 3  
Quad Cities Station Units 1 and 2  
Mark I Containment Program  
General Electric Report NEDO-21888, "Mark I  
Containment Program Load Definition Report"  
NRC Docket Nos. 50-237/249 and 50-254/265

Dear Mr. Eisenhut:

The final part of the subject report has been transmitted to the NRC by GE via L. J. Sobon's letter to V. Stello, dated March 15, 1979. This report provides information required to define the hydrodynamic loads produced on the containment system of domestic Mark I plants during postulated loss-of-coolant-accidents, safety/relief valve discharges and related dynamic events. The final part of the report, NEDO-21888, should be included on the Dresden and Quad Cities dockets.

Very truly yours,

Robert F. Janecek  
Nuclear Licensing  
Administrator  
Boiling Water Reactors
