Dear Mr. Peoples:

RE: SEP TOPIC VIII-2, ONSITE EMERGENCY POWER SYSTEMS - DIESEL GENERATOR  
 (DRESDEN UNIT 2)

Enclosed is a copy of our evaluation of Systematic Evaluation Program Topic VIII-2, Onsite Emergency Power Systems - Diesel Generator. This assessment compares your facility, as described in Docket No. 50-237, with the criteria currently used by the regulatory staff for licensing new facilities. Please inform us if your as-built facility differs from the licensing basis assumed in our assessment within 30 days of receipt of this letter.

This evaluation will be a basic input to the integrated safety assessment for your facility unless you identify changes needed to reflect the as-built conditions at your facility. This topic assessment may be revised in the future if your facility design is changed or if NRC criteria relating to this topic are modified before the integrated assessment is completed.

Sincerely,

Dennis M. Crutchfield, Chief  
 Operating Reactors Branch #5  
 Division of Operating Reactors
