Attachment A - Schedule

A.1 PURPOSE OF GRANT

The purpose of this Grant is to provide support to the "Texas A&M University-Kingsville Nuclear Doctoral Fellowship Program" as described in Attachment B entitled "Program Description."

A.2 PERIOD OF GRANT

1. The effective date of this Grant is June 30, 2017. The estimated completion date of this Grant is June 29, 2021.
2. Funds obligated hereunder are available for program expenditures for the estimated period: June 30, 2017 – June 29, 2021.

A.3 GENERAL

- | | |
|--------------------------------|--|
| 1. Total Estimated NRC Amount: | \$400,000.00 |
| 2. Total Obligated Amount: | \$400,000.00 |
| 3. Cost-Sharing Amount: | \$173,750.00 |
| 4. Activity Title: | Texas A&M University-Kingsville Nuclear
Doctoral Fellowship Program |
| 5. NRC Project Officer: | Nancy Hebron-Isreal |
| 6. DUNS No.: | 868154089 |

A.4 AMOUNT OF AWARD AND PAYMENT PROCEDURES

1. The total estimated amount of this Award is \$573,750.00 for the four year period; inclusive of \$173,750.00 in cost share.
2. NRC hereby obligates the amount of \$400,000.00 for program expenditures during the period set forth above and in support of the Budget above. NRC is not obligated to reimburse the Grantee for the expenditure of amounts in excess of the total obligated amount.
3. Payment shall be made to the Recipient in accordance with procedures set forth in the Automated Standard Application for Payments (ASAP) Procedures set forth below.

A.5 BUDGET

Revisions to the grant award budget shall be made in accordance with Revision of Grant Budget in accordance with [2 CFR § 200.308](#).

SECTION B - BUDGET CATEGORIES

6. Object Class Categories	GRANT PROGRAM, FUNCTION OR ACTIVITY				Total (5)

ATTACHMENT B - PROJECT DESCRIPTION

Introduction: Texas A&M University-Kingsville (TAMUK) offers the only two engineering doctoral programs in South Texas: Sustainable Energy System Engineering (SESE) and Environmental Engineering (EVEN). These two doctoral programs provide excellent opportunities for qualified TAMUK students and exceptional students from other universities to pursue postgraduate education here. The newly established SESE PhD program draws research-active faculty members from various engineering disciplines to form an advisory board. Some research areas closely fit the NRC interests, such as neutronics, thermal-hydraulics, advanced reactors, nuclear material, and environmental protection and restoration for uranium mining. The SESE Ph.D. program also cultivates interdisciplinary students. Students who graduate with nuclear related dissertations will possess knowledge of other engineering areas, due to the deliberately designed comprehensive doctoral curriculum and inter-departmental and inter-institutional research collaborations. TAMUK is a Hispanic Serving Institute (HSI) located in South Texas. About 62% of the students are Hispanic, and 47% are female. The university consistently ranks among the country's top 10 producers of Hispanic engineers. The aim of the proposed nuclear fellowship program is to enhance the nuclear related graduate research and education at TAMUK, bring more highly qualified students to the nuclear area, prepare students to support the mission of the NRC, and promote the underrepresented groups in nuclear engineering.

1. Objectives

- a) Within the 4-years project period, the proposed fellowship program will support five Ph.D. students in either SESE or EVEN doctoral programs at TAMUK whose dissertation topics are in the area of nuclear engineering (2 recruited in Yr1; 2 recruited in Yr2; 1 recruited in Yr3). Each student will be supported for two years with a monthly stipend of [REDACTED]. The program will also cover the fellows' in-state tuition and fees for 2 years. The tuition and fees are estimated to be [REDACTED] per student per year. The total cost for one student is [REDACTED].
- b) The program will partially support the travel cost of recipients for presenting scholarly articles at professional conferences. The travel fund is estimated to be [REDACTED] for all current and past fellows.
- c) The faculty advisors are committed to provide mentoring for fellows' career development and help the fellows to connect nuclear industry and research institutions to fulfill the country's nuclear workforce demand.
- d) The fellowship will attract and recruit highly qualified students from the nation, retain them in the area of nuclear engineering, and increase the participation of the underrepresented groups in nuclear engineering.

2. Nuclear Research Areas Relevant to NRC Research Interests

TAMUK faculty members whose research interests are relevant to nuclear are included as PIs in this proposal. Selected research highlights are presented as follows.

2.1 High-Fidelity Reactor Neutronics Modeling with Hardware Accelerators

The design and simulation of the next generation nuclear reactors require advanced nuclear codes with the capabilities of performing high-fidelity reactor modeling without spatial homogenization to produce high resolution of the core power densities. Neutronics modeling provides valuable core power profiles and it is the basis of other reactor simulations, such as thermos-fluid and depletion calculations. It is of great importance to reactor design and safety analysis. The newly developed MOCUM (Method of Characteristics Unstructured Meshes) code is an advanced 2-D computational reactor physics code that fulfills the desired expectations of

modeling complex reactor core geometries without spatial homogenization [1]–[3]. The two pivotal wings necessary for a successful nuclear reactor simulation tool are: computational capabilities and physics principles. The versatility of the MOCUM code has been demonstrated by the calculations of various types of reactors including BWR lattice, CANDU-6 fuel bundle, plate-type fast reactor, hexagonal high temperature reactor, and heterogeneous MOX fuel reactor. The results demonstrate the code's superior accuracy and efficiency. However, reactor 3-D simulation at such a scale is very computational intensive. Weeks of runtime are needed to complete a medium-sized problem even on an advanced computing cluster, which is impractical for reactor design and analysis. The solution to overcome this difficulty is the hardware accelerators. They are currently becoming increasingly important in boosting high performance computing. A well-tuned program can run much faster on accelerators than on CPUs. Interdisciplinary research bridging nuclear engineering and scientific computing will open a new era for the present nuclear programs and make the future 3-D high-fidelity reactor modeling possible. The objective of this research is to investigate the feasibility of integrating the method of characteristic (MOC) with hardware accelerators like Intel Xeon Phi and GPU for massively parallel computing and 3-D reactor simulation. The doctoral student will implement advanced computational geometry algorithms to decompose the 3-D complex core geometry into a large set of tetrahedrons or other types of unstructured polyhedrons, and develop sophisticated hybrid parallel algorithms (MPI + OpenMP) to efficiently use both CPUs and accelerators in the system. Memory flow control, data feeding, dynamic job allocation algorithms will play important roles in the program efficiency.

2.2 Atomic Simulation of Material Erosion by Ion Irradiation

To accomplish controlled fusion reactions, one of the major challenges is the plasma facing materials (PFMs) erosion by energetic plasma particle bombardment. The overall process erodes wall materials, reduces their thermo-mechanical properties, ceases the fusion reaction, and traps radioactive tritium. There is an increasing demand for further understanding of the response of the PFMs, especially tungsten, under fusion environment. The knowledge of detailed surface erosion heavily relies on numerical simulations, because experiments cannot reveal the erosion mechanism, and the toxicity and high cost prevent experiments from being conducted. The research objective is to investigate the PFM tungsten response to various plasma bombardment conditions using computer simulations. Based on the past studies [4]–[8], the student will use atomic simulation methods, such as molecular dynamics (MD) and kinetic Monte Carlo (KMC) to study the tungsten surface response to ion irradiation. The research will focus on the investigation of tungsten surface morphologies, tungsten nanostructure formation simulation, and tritium retention and removal from tungsten. The findings will shed light on the practical usage of tungsten as a PFM in fusion environment.

2.3 Simulation of Fluidic Diodes for The PB-AHTR Using Computational Fluid Dynamics

Vortex diodes act as flow control devices. They offer high resistance to flow in one direction and little resistance in the opposite direction and accomplish this task without any moving parts, making them reliable and efficient. The Pebble Bed Advanced High Temperature Reactor (PB-AHTR) will use vortex diodes as an integral part of its design to provide continuous cooling during normal operating and after emergency shut off. The PB-AHTR natural circulation loop will require a fluidic diode to minimize flow leak during normal operation while providing a low resistance to forward flow after planned or emergency shutoff. The vortex diode consists of a circular disc fitted with a tangential circular inlet port and a circular outlet exit port (in the high resistance flow direction). The fluid flow suffers a large pressure drop as it enters the diode from the tangential port as it establish a vortex flow, while it suffers low pressure drop when the fluid enters in the opposite direction and moves in the radial direction to exit from the tangential port. The performance of the diode is characterized by the ratio of the pressure drop in the high resistance

to the low resistance flow directions for the same mass flow rates and diodisity. This research will provide a parametric study of such a diode. The solid model will be meshed using ANSYS. Main research components include developing new vortex diodes with webs installed in the diode chamber to increase the pressure drop in the high resistance flow direction and optimize the shape of these ribs for that objective, and investigating other possibilities for achieving high pressure drop in the reverse direction in the natural circulation loop by using other devices such as rectifier diodes.

2.4 Groundwater Bioremediation at Uranium In-Situ Recovery (ISR) Mining Sites

South Texas has been a leading region in the U.S. for supplying uranium to the nuclear power industry. In 2014, the Environmental Protection Agency proposed new regulations imposing stricter groundwater restoration standards at ISR uranium mining facilities [9]. Researchers at TAMUK have been working with the mining industry to develop improved technologies for restoring groundwater at ISR mining sites using inorganic reductants to stimulate in-situ microbial reduction and immobilization of uranium. These studies were driven by hypotheses that inorganic reductants will: 1) stimulate indigenous *autotrophic* bacteria with low growth yields, resulting in minimal formation bioclogging; and 2) decrease dissolved carbonate, reducing formation of highly soluble uranyl-carbonate species. Recent pilot studies have validated these hypotheses [10]–[12], with one study achieving a 95% decrease in dissolved uranium at an ISR mining site when over 2 million gallons of groundwater were amended with dissolved hydrogen and reinjected into the formation [10]. However, these studies also demonstrated that most of the injected reductant was consumed by sulfate-reducing bacteria, resulting in sub-optimal dispersal of reductant into the surrounding formation. To address this inefficiency, recent lab-scale microcosm studies conducted at TAMUK demonstrated that sodium dithionite, a reductant thermodynamically incapable of supporting sulfate-reducing bacteria, can successfully stimulate microbial uranium- (and iron-) reduction [13]. The objective of the proposed study is to compare sodium dithionite (SDT) and calcium polysulfide (CPS) as reductants for stimulating microbial reduction and immobilization of U(VI) in continuous flow-through sediment columns. It is hypothesized that CPS, being a stronger reductant, will stimulate U(VI), Fe(III) *and* sulfate reduction, whereas SDT will stimulate U(VI) and Fe(III) reduction only, resulting in significantly improved reductant utilization efficiency. The experimental results will be used to calibrate a geochemical and solute transport model to be developed using the PHAST software package [14].

3. Recruitment Activities and Marketing Strategies

The fellowship opportunity will be posted on the two doctoral programs' websites to let the current and perspective graduate students know of these opportunities. Before the end of the spring semester, the PIs will send emails to all doctoral advisors to invite their qualified students to apply. Faculty members will share these opportunities with their students at all levels. The PIs will also compile flyers and brochures with detailed fellowship program introduction. They will be distributed through emails and posted in the engineering building. A nuclear seminar will be hosted before the fall semester to present the nuclear engineering track in the Ph.D. programs and the fellowship support for nuclear Ph.D. study. In addition, the PIs will work with the Javelina Engineering Student Success Center (JESSC) to disseminate the announcement through social media like Facebook and LinkedIn and the campus newspaper to reach more audiences. Student organizations including Society of Women Engineers (SWE), Society of Hispanic Professional Engineers (SHPE) and Mexican American Engineering Society (MAES) will be contacted to promote the fellowship program to underrepresented students. To attract the external applicants, fellowship opportunity will be emailed to the departments at about thirty other universities offering nuclear engineering programs to broaden the impacts. We have successfully recruited a few

excellent applicants from other universities for NSF-funded undergraduate summer research at TAMUK in the nuclear area, and this method has been proven to be very successful.

4. Selection Process and Management Plan.

The application selection processes and criteria are carefully designed to select well-motivated students with outstanding academic achievement. The fellowship applicants must be either U.S. citizens, noncitizen nationals, or permanent residents. The applicants must also have overall undergraduate and graduate (if available) GPA of 3.3 or higher at the time of the applications. Other supporting application documents are official transcripts from all past institutions, two recommendation letters, completed application form, and a one-page summary of the proposed dissertation topic. The deadline of each year's fellowship application is the mid-semester day in the spring semester. The selection is primarily based on the applicants' past academic merits and the area of dissertation. The PIs will form a fellowship committee to determine if the proposed Ph.D. topic is within the NRC interests. The applicants with qualified Ph.D. topics will then be ranked according to their academic aptitude and recommendation letters. Among students with similar background, priority will be given to underrepresented minority groups such as Hispanics and females. Exceptional new applicants may be accepted earlier and the offer letter will be sent out with their admission letter to attract and retain excellent students in the Ph.D. program and in the nuclear track. However, the fellowship positions will remain open until filled if no suitable applicants are available.

The fellowship committee will closely monitor the academic performance of the fellows at TAMUK. If a fellow fails to maintain a cumulative GPA of 3.3, the fellow will be immediately removed from the fellowship program. The committee may award another student using the remaining fund following the same selection process. If the fellow does not register as a full-time student for a certain semester, the fellow will not receive his/her stipend during that semester. The fellows are required to notify the committee if they plan to change their dissertation topics. They are also required to submit their final dissertations and defense slides to the fellowship committee prior to the graduation. If the committee determines that the new topics are not in the area of nuclear engineering, the fellows will be asked to choose another nuclear related topic or they will be removed from the fellowship program and any awarded amount must be returned by the fellows.

The fellows are encouraged to attend professional conferences to disseminate their research outcomes, obtain feedback from the peers, and establish connections. About ~15% of the total requested funding will be used to cover the recipients' travel expenses. Internship is an important component in the professional development of the doctoral students. It allows the PhD candidates to apply their knowledge to solve real world problems and exhibit their competence to potential future employers. The PIs and faculty members in the two doctoral programs are committed to providing internships and job opportunities suitable for developing the fellows' expertise needed by their research by connecting the fellowship recipients to national labs and companies. In the past summer, we sent two students in the nuclear program to the Center for Neutron Research at the National Institute of Standards and Technology (NIST) for summer internships and provided nuclear licensing job application referrals for the Tennessee Valley Authority. Another mobile radiation personal dosimeter internship with Touchberry Inc. was brought by the PI in the past spring semester as well. Represented by the PI, the TAMUK nuclear program is one of the key educational partners of the Nuclear Power Institute (NPI). Through NPI, TAMUK is connected to all institutions offering nuclear education in the Texas A&M System and several community colleges. Intercollegiate cooperation allows students to access research facilities and faculty advisors at other institutions. Recently, one student was sent to Texas A&M University, College

Station, as a visiting student, to learn and perform material irradiation experiments for one semester. The PIs and other faculty members will continue these efforts to help the recipients gain work experience.

The proposed fellowship program will last four years. The overall project management will be performed by the PI, [REDACTED], who is an assistant professor of mechanical engineering leading the TAMUK nuclear minor program. His research interests include transport methods for high fidelity reactor modeling, atomic simulation of material surface erosion by ion radiation, and radiation transport modeling. He will be responsible for the overall performance of the project, including program promotion, selection, fellowship follow-up, and program evaluation.

[REDACTED] is a professor of mechanical engineering, who founded the TAMUK nuclear minor program. He specializes in thermal-hydraulic modeling and molten salt reactor analysis. [REDACTED] will be the Co-PI and oversee the entire project to ensure the quality and progress of the fellowship program meet or exceed expectations. He will also be heavily involved in dissemination, applicant review, and program evaluation. [REDACTED] will be responsible for the execution of the proposed project in the SESE doctoral program.

[REDACTED] is a professor and chairman of Environmental Engineering (EVEN). His research focuses on assessment of uranium mining environmental impact and restoration, and groundwater quality monitoring. [REDACTED] will be a Co-PI and he will be in charge of the project execution in the EVEN doctoral program.

5. Evaluation Plan

The success of TAMUK Nuclear Fellowship Program is based on the following anticipated achievements: a) support and cultivate outstanding nuclear engineering doctoral graduates who will join the nation's nuclear research and industry to satisfy the need for professional leadership in the nuclear area; b) advance the nuclear related research at TAMUK; and c) promote and develop the TAMUK SESE and EVEN Ph.D. programs, especially in the nuclear discipline.

The success of the program cannot be fully evaluated before completion of the program. However, during the execution of the program, analysis of the following data can be used to demonstrate the effectiveness. The marketing strategies will attract more talented students to study nuclear topics. The number and the background of the nuclear applicants are anticipated to be higher and stronger than other applicants. With the continuous and stable support of the fellows, their academic performances are expected to be better than other students. This can be evaluated by the graduate GPA, and number and quality of publications.

The fellows are expected to conduct cutting edge research in nuclear science and engineering. The advancement of nuclear knowledge will benefit the entire science society, and the research achievement will be regularly disseminated through professional conferences and leading journals. Upon the completion of their Ph.D. study, the placement of the fellowship recipients in professional leadership positions in industry, government, military, or research institutions will be the ultimate goal of this fellowship program. Moreover, the fellowship support at a Hispanic Serving Institution will promote the nuclear study opportunity for minorities, and the program will reach far more minorities here than most other institutions. The undergraduate nuclear minor program will significantly benefit from the fellowship program as well, because the fellows will have many opportunities to interact with the TAMUK nuclear undergraduates.

6. Institution Commitment and Leveraged Funding

The Frank H. Dotterweich College of Engineering is committed to provide graduate teaching assistant funding for all fellowship recipients in the SESE doctoral program. [REDACTED]

The Department of Environmental Engineering is committed to provide graduate research assistant fund for all fellowship recipients in the ENVE doctoral program. [REDACTED]

The continuing support for the fellows will ensure that they finish their research and education without financial issues. Research grants from the fellows' advisors will provide additional financial support.

ATTACHMENT C – STANDARD TERMS AND CONDITIONS

The Nuclear Regulatory Commission's Standard Terms and Conditions for U.S. Nongovernmental Recipients

Preface

This award is based on the application submitted to, and as approved by, the Nuclear Regulatory Commission (NRC) under the authorization [42 U.S.C. § 2051\(b\)](#), pursuant to section 31b and 141b of the Atomic Energy Act of 1954, as amended, and is subject to the terms and conditions incorporated either directly or by reference in the grant or cooperative agreement. The following also apply:

- Restrictions on the expenditure of Federal funds in appropriation acts, to the extent those restrictions are pertinent to the award.
- Code of Federal Regulations/Regulatory Requirements – [2 CFR Part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards](#).

Any inconsistency or conflict in terms and conditions specified in the award will be resolved according to the following order of precedence: public laws, regulations, applicable notices published in the Federal Register, Executive Orders (E.O.), Office of Management and Budget (OMB) Circulars, the NRC's Mandatory Standard Provisions, special award conditions, and standard award conditions.

Certifications and Representations: These terms incorporate the certifications and representations required by statute, executive order, or regulation that were submitted with the SF424B application through [GRANTS.GOV](#).

I. Mandatory General Requirements

The order of these requirements does not make one requirement more important than any other requirement.

1. Applicability of 2 CFR Part 200

All provisions of 2 CFR Part 200 and all Standard Provisions attached to this grant/cooperative agreement are applicable to the Recipient and to sub-recipients which meet the definition of "Recipient" in 2 Part [§200.86](#), unless a section specifically excludes a sub-recipient from

coverage. The Recipient and any sub-recipients must, in addition to the assurances made as part of the application, comply and require each of its sub-awardees employed in the completion of the project to comply with [Subpart D](#) of [2 CFR Part 200](#) and include this term in lower-tier (sub-award) covered transactions.

Recipients must comply with monitoring procedures and audit requirements in accordance with [2 CFR Part 200, Subpart F—AUDIT REQUIREMENTS](#).

2. Award Package

The Recipient is obligated to conduct project oversight as may be appropriate, to manage the funds with prudence, and to comply with the provisions outlined in [2 CFR Part 200](#). Within this framework, the Principal Investigator (PI) named on the award face page, is responsible for the scientific or technical direction of the project and for preparation of the project performance reports. This award is funded on a cost-reimbursement basis, not to exceed the amount awarded as indicated on the face page, and is subject to a refund of unexpended grant funds to the NRC.

The non-Federal entity alone must be responsible, in accordance with good administrative practice and sound business judgment, for the settlement of all contractual and administrative issues arising out of procurements related to its grant award. These issues include, but are not limited to, source evaluation, protests, disputes, and claims. These standards do not relieve the non-Federal entity of any financial or fiduciary responsibilities or obligations arising under its grant, including sub-contracts and sub-awards, or any other contractual or financial obligation. The Federal awarding agency will not substitute its judgment for that of the non-Federal entity unless the matter is primarily a Federal concern. Violations of law will be referred to the local, State, or Federal authority having proper jurisdiction. See [2 CFR § 200.318\(k\)](#), General Procurement Standards.

Subawards

[Appendix II to Part 200](#) Contract Provisions for Non-Federal Entity Contracts Under Federal Awards

Sub-recipients, sub-awardees, and contractors have no relationship with NRC under the terms of this grant/cooperative agreement. All required NRC approvals must be directed through the Recipient to NRC. See [2 CFR § 200.318](#).

Nondiscrimination

This provision is applicable when work under the grant/cooperative agreement is performed in the U.S. or when employees are recruited in the U.S.

The Recipient agrees to comply with the non-discrimination requirements below:

- Title VI of the Civil Rights Act of 1964 (42 U.S.C. §§ 2000d et seq.), which prohibits discrimination on the grounds of race, color, or national origin in any program or activity receiving federal financial assistance.
- Title IX of the Education Amendments of 1972 (20 U.S.C. §§ 1681 et seq.), which prohibits discrimination on the basis of sex in any education program or activity receiving federal financial assistance.

- Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of disability in any program or activity receiving federal financial assistance.
- The Age Discrimination Act of 1975, as amended (42 U.S.C. §§ 6101 et seq.), which prohibits discrimination on the basis of age in any program receiving federal financial assistance.
- The Americans with Disabilities Act of 1990 (42 U.S.C. §§ 12101 et seq.), which prohibits recipients from discriminating on the basis of disability in employment (Title I); State and local government services (Title II); and places of public accommodation and commercial facilities (Title III).
- Parts II and III of E.O. 11246, as amended by E.O. 11375, 11478, 12086, 12107, 13279, 13665, and 13672, which prohibits federal contractors and federally assisted construction contractors and subcontractors, who do over \$10,000 in Government business in one year, from discriminating in employment decisions on the basis of race, color, religion, sex, or national origin and requires that government contractors take affirmative action to ensure that equal opportunity is provided in all aspects of their employment.
- E.O. 13166, "Improving Access to Services for Persons with Limited English Proficiency," which clarifies that national origin discrimination under Title VI includes discrimination on the basis of limited English proficiency (LEP) and requires that the recipient take reasonable steps to ensure that LEP persons have meaningful access to programs and activities.
- Any other applicable non-discrimination law(s).

Generally, Title VII of the Civil Rights Act of 1964, 42 U.S.C. § 2000e et seq, provides that it shall be an unlawful employment practice for an employer to discharge any individual or otherwise to discriminate against an individual with respect to compensation, terms, conditions, or privileges of employment because of such individual's race, color, religion, sex, or national origin. However, Title VII, 42 U.S.C. § 2000e-1(a), expressly exempts from the prohibition against discrimination on the basis of religion, a religious corporation, association, educational institution, or society with respect to the employment of individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its activities.

Applicants must ensure that individuals selected as beneficiaries of support under this grant meet the legal requirements consistent with Supreme Court Decisions including *Fisher*, *Gratz*, and *Grutter*.

Modifications/Prior Approval

NRC's prior written approval may be required before a Recipient makes certain budget modifications or undertakes particular activities. If NRC approval is required for changes in the grant or cooperative agreement, it must be requested and obtained from the NRC Grants Officer in advance of the change or obligation of funds. All requests for NRC prior approval, including requests for extensions to the period of performance, must be made, in writing (which includes submission by e-mail), to the designated Grants Officer at least 30 days before the proposed change. The request must be signed by the authorized organizational official. Failure to obtain prior approval, when required, from the NRC Grants Officer, may result in the disallowance of costs, or other enforcement action within NRC's authority.

Lobbying Restrictions

The Recipient will comply, as applicable, with provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limits the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

The Recipient will comply with provisions of 31 U.S.C § 1352. This provision generally prohibits the use of Federal funds for lobbying in the Executive or Legislative Branches of the Federal Government in connection with the award, and requires disclosure of the use of non-Federal funds for lobbying.

The Recipient shall submit, at the time of application, a completed "Certification Regarding Lobbying" form, regardless of dollar value.

If applicable, the Recipient receiving in excess of \$100,000.00 in Federal funding shall submit a completed Standard Form (SF-LLL), "Disclosure of Lobbying Activities" for any persons engaged in lobbying activities, as discussed at 31 U.S. Code § 1352 – Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions. The form concerns the use of non-Federal funds for lobbying within 30 days following the end of the calendar quarter in which there occurs any event that requires disclosure or that materially affects the accuracy of the information contained in any disclosure form previously filed. If the Recipient must submit the SF-LLL, including those received from sub-recipients, contractors, and subcontractors, to the Grants Officer.

Debarment And Suspension – (See [2 CFR Part 180](#); [2 CFR § 200.205](#); [2 CFR § 200.113](#); and [2 CFR Part 200, Appendix II.](#))

The Recipient agrees to notify the Grants Officer immediately upon learning that it or any of its principals:

- (1) Are presently excluded or disqualified from covered transactions by any Federal department or agency;
- (2) Have been convicted, within the preceding three-year period preceding this proposal, of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, receiving stolen property, making false claims, or obstruction of justice; commission of any other offense indicating a lack of business integrity or business honesty that seriously and directly affects the recipient's present responsibility;
- (3) Are presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (1)(b); or
- (4) Have had one or more public transactions (Federal, State, or local) terminated for cause or default within the preceding three years.
- (5) The Recipient agrees that, unless authorized by the Grants Officer, it will not knowingly enter into any subaward or contracts under this grant/cooperative agreement with a person or entity that is not included on the System for Award Management (SAM) (<https://www.sam.gov>).

The Recipient further agrees to include the following provision in any subaward or contracts entered into under this award:

Debarment, Suspension, Ineligibility, and Voluntary Exclusion

The Recipient certifies that neither it nor its principals is presently excluded or disqualified from participation in this transaction by any Federal department or agency. The policies and procedures applicable to debarment, suspension, and ineligibility under NRC-financed transactions are set forth [2 CFR Part 180](#) and [2 CFR Part 200](#).

Drug-Free Workplace

The Recipient must be in compliance with The Federal Drug Free Workplace Act of 1988. The policies and procedures applicable to violations of these requirements are set forth in [41 U.S.C. §§ 8101-8106](#).

Implementation of E.O.13224 – Executive Order on Terrorist Financing

The Recipient is reminded that U.S. Executive Orders and U.S. law prohibits transactions with, and the provision of resources and support to, individuals and organizations associated with terrorism. It is the legal responsibility of the Recipient to ensure compliance with these Executive Orders and laws. This provision must be included in all contracts/sub-awards issued under this grant/cooperative agreement.

The Recipient must comply with E.O. 13224, Blocking Property and Prohibiting Transactions with Persons who Commit, Threaten to Commit, or Support Terrorism. Information about this Executive Order can be found at:

[Implementation of Executive Order 13224 Blocking Property and Prohibiting Transactions With Persons Who Commit, Threaten To Commit, or Support Terrorism amended by E.O. 13268, 13284, and 13372.](#)

Procurement Standards - 2 CFR §§ 200.318-200.326

Sections 200.318 - 200.326 set forth standards for use by Recipients in establishing procedures for the procurement of supplies and other expendable property, equipment, real property and other services with Federal funds. These standards are furnished to ensure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal statutes and executive orders. No additional procurement standards or requirements will be imposed by the Federal awarding agencies upon Recipients, unless specifically required by Federal statute, executive order, or approved by OMB.

Travel and Transportation

Travel must be in accordance with the Recipient's Travel Regulations or the U.S. Government Travel Policy and Regulations at: <http://www.gsa.gov/portal/category/21222> and the per diem rates set forth at: <http://www.gsa.gov/portal/content/104877>, absent Recipient's travel regulations. Travel and transportation costs for the grant must be consistent with provisions as established in [2 CFR § 200.473-474](#).

All other travel, domestic or international, must not increase the total estimated award amount for the grant.

The Recipient will comply with the provisions of the Fly America Act (49 U.S.C 40118), as implemented at 41 CFR §§ 301-10.131 through 301-10.143.

Federal funds may not be used to travel to countries identified as “Foreign Policy Restricted Countries”, as identified by the U.S. Department of State or the U.S. Agency for International Development.

Property Standards

Property standards of this award shall follow provisions as established [2 CFR §§ 200.310-200.316](#).

Intangible Property

Intangible and intellectual property of this award shall generally follow provisions established in [2 CFR § 200.315](#).

Inventions Report - The Bayh-Dole Act (P.L. 96-517) affords Recipients the right to elect and retain title to inventions they develop with funding under an NRC grant award (“subject inventions”). In accepting an award, the Recipient agrees to comply with applicable NRC policies, the Bayh-Dole Act, and its Government-wide implementing regulations found at Title 37, Code of Federal Regulations (CFR) Part 401. A significant part of the regulations require that the Recipient report all subject inventions to the awarding agency (NRC) as well as include an acknowledgement of federal support in any patents.

Patent Notification Procedures - If the NRC or its Recipients, without making a patent search, knows (or has demonstrable reasonable grounds to know) that technology covered by a valid United States patent has been or will be used without a license from the owner, E.O.12889 requires NRC to notify the owner. If the Recipient uses or has used patented technology under this award without license or permission from the owner, the Recipient must notify the Grants Officer. This notice does not imply that the Government authorizes and consents to any copyright or patent infringement occurring under the financial assistance.

Data, Databases, and Software - The rights to any work produced or purchased under a NRC federal financial assistance award, such as data, databases or software are determined by [Subpart D of 2 CFR Part 200](#). The Recipient owns any work produced or purchased under a NRC federal financial assistance award subject to NRC’s right to obtain, reproduce, publish or otherwise use the work or authorize others to receive, reproduce, publish or otherwise use the data for Government purposes.

Copyright - The Recipient may copyright any work produced under a NRC federal financial assistance award subject to NRC’s royalty-free nonexclusive and irrevocable right to reproduce, publish or otherwise use the work or authorize others to do so for Government purposes. Works jointly authored by NRC and Recipient employees may be copyrighted, but only the part authored by the Recipient is protected because, under [17 U.S.C. § 105](#), works produced by Government employees are not copyrightable in the United States. On occasion, NRC may ask the Recipient to transfer to NRC its copyright in a particular work when NRC is undertaking the primary dissemination of the work. Ownership of copyright by the Government through assignment is permitted under [17 U.S.C. § 105](#).

Record Retention and Access

Recipient shall follow established provisions in [2 CFR §§ 200.333-337](#).

Conflict Of Interest

Conflict of Interest standards for this award will follow the Organizational Conflict of Interest (OCOI) requirements set forth in Section 170A of the Atomic Energy Act of 1954, as amended, and provisions set forth at [2 CFR § 200.112](#), Conflict of Interest.

Dispute Review Procedures

- a. Any request for review of a notice of termination or other adverse decision should be addressed to the Grants Officer. It must be postmarked or transmitted electronically no later than 30 days after the postmarked date of such termination or adverse decision from the Grants Officer.
- b. The request for review must contain a full statement of the Recipient's position and the pertinent facts and reasons in support of such position.
- c. The Grants Officer will promptly acknowledge receipt of the request for review and shall forward it to the Director, Office of Acquisition Management Division, unless otherwise delegated, who shall appoint an intra-agency Appeal Board to review a recipient appeal of an agency action, if required, which will consist of the program office director, the Deputy Director of Office of Administration, and the Office of General Counsel, or their designees.
- d. Pending resolution of the request for review, the NRC may withhold or defer payments under the award during the review proceedings.
- e. The review committee will request the Grants Officer who issued the notice of termination or adverse action to provide copies of all relevant background materials and documents. The committee may, at its discretion, invite representatives of the Recipient and the NRC program office to discuss pertinent issues and to submit such additional information as it deems appropriate. The chairman of the review committee will insure that all review activities or proceedings are adequately documented.
- f. Based on its review, the committee will prepare its recommendation to the Director, Office of Administration, who will advise the parties concerned of his/her decision.

Remedies for Noncompliance

Termination of this award will follow provisions as established and described above in "Dispute Review Process" in [2 CFR §§ 200.338-342](#).

Performance and Financial Monitoring and Reporting - 2 CFR §§ 200.327-329

Recipient Financial Management systems must comply with the provisions in [2 CFR § 200.302](#).

- Payment – [2 CFR § 200.305](#)
- Cost Share or Matching – [2 CFR § 200.306](#)
 - Recipients are to be careful with providing excessive cost share or match since at the end of the grant, if the identified match has not been provided, then a portion of the federal share may be required to be returned to the Government.
- Program Income – [2 CFR § 200.307](#)

- Earned program income, if any, will be added to funds committed to the project by the NRC and Recipient and used to further eligible project or program objectives or be deducted from the total project cost for the grant, as directed by the Grants Officer or indicated in the terms and conditions of the award.
- Revision of Budget and Program Plans – [2 CFR § 200.308](#)
 - The Recipient is required to report deviations from the approved budget and program descriptions in accordance with – [2 CFR § 200.308\(b\)](#) and request prior written approval from the Project Officer and the Grants Officer.
 - The Recipient is not authorized to re-budget between direct costs and indirect costs without written prior approval of the Grants Officer.
 - The Recipient is authorized to transfer funds among direct cost categories up to a cumulative 10 percent of the total approved budget. The Recipient is not allowed to transfer funds if the transfer would cause any Federal appropriation to be used for purposes other than those consistent with the original intent of the appropriation.
 - Allowable Costs – [2 CFR §§ 200.403](#)
- See section [2 CFR §§ 200.330-332](#) for Subrecipient Monitoring and Management.

FEDERAL FINANCIAL REPORTS

Federal Financial Reports (SF-425) are semi-annually, for the periods ending March 31 and September 30. Reports are due within 30 calendar days following the end of the reporting period and must be emailed to the Project Officer at the email addressed indicated in the Notice of Award, and to the Grants Officer at: Grants_FFR.Resource@nrc.gov. (NOTE: There is an underscore between Grants and FFR in the email address.) The SF-425 form and instructions are available at the following URL: http://www.whitehouse.gov/omb/grants_forms/.

PERFORMANCE PROGRESS REPORTS

The performance (technical) reports indicated below are subject to [2 CFR §200.328](#).

Fellowship Programs

Performance Progress reports must be submitted annually, for the period ending September 30, or any portion thereof, regardless of the award date. Reports are due within 30 days following the end of each reporting period and must be emailed to the Project Officer at the email addressed indicated in the Notice of Award, and to the Grants Officer at: Grants_PPR.Resource@nrc.gov. (NOTE: There is an underscore between Grants and PPR in the email address.)

Final Reports - The Recipient is required to submit final reports, both Financial (SF-425) and Performance (SF-PPR, SF-PPR-B, SF-PPR-E) within 90 days of the grant expiration. In addition to these reports, a final SF-428, Tangible property report, is also required, if applicable. The final PPR (for Scholarship, Fellowship, and Trade School and Community College Scholarship awards) must include the names of all students with up to date contact information (mailing address, telephone/cell phone, email address). The reports must be emailed to the Project Officer at the email addressed indicated in the Notice of Award, and to the Grants Officer at: Grants_FFR.Resource@nrc.gov and Grants_PPR.Resource@nrc.gov. (NOTE: There

is an underscore between Grants and FFR and Grants and PPR in the email addresses.)

For grant awards that are modified to add additional Program Descriptions, the recipient is required to address the applicable grant performance metrics associated with all programs. Further, these metrics should be broken out by individual program (e.g. Program A and Program B). This can be done utilizing Block 10, Performance Narrative, of the SF-PPR form. If this block does not have sufficient space, additional pages will be accepted. Sf-PPR-B and SF-PPR-E should be used to address both programs as well.

Period of Performance – 2 CFR § 200.309

The recipient may charge to the Federal award only allowable costs incurred during the period of performance and any costs incurred before the NRC or pass-through entity made the Federal award that was authorized by the NRC or pass through entity.

Unless otherwise authorized in [2 CFR Part 200](#) or by special award condition, any extension of the award period can only be authorized by the Grants Officer in writing. Assurances of funding from other than the Grants Officer shall not constitute authority to obligate funds for programmatic activities beyond the expiration date.

The NRC Grant Officer may authorize a no cost extension of the period of performance. The recipient must submit a no cost extension request no less than 30 days prior to the award end date. Any request for a no cost extension after the grant has expired will not be approved. However, the NRC has no obligation to provide any additional prospective or incremental funding. Any modification of the award to increase funding and/or to extend the period of performance is at the sole discretion of the NRC.

Automated Standard Application For Payments (ASAP) Procedures

Unless otherwise stated, Recipient payments are made using the Department of Treasury's Automated Standard Application for Payment (ASAP) system, [ASAP.gov](#), through preauthorized electronic funds transfers. To receive payments, Recipients are required to enroll with the Department of Treasury, Financial Management Service, and Regional Financial Centers, which allows them to use the on-line method of withdrawing funds from their ASAP established accounts. The following information is required to make ASAP withdrawals: (1) ASAP account number – the award number found on the cover sheet of the award; (2) Agency Location Code (ALC) – 31000001; and Region Code. Recipients enrolled in the ASAP system do not need to submit a "Request for Advance or Reimbursement" (SF-270).

II. Audit Requirements

Audits

Organization-wide or program-specific audits are performed in accordance with the Single Audit Act of 1996, as amended, and as implemented by [2 CFR Part 200, Subpart F—AUDIT REQUIREMENTS](#). Recipients are subject to the provisions of this subpart if they expend \$750,000 or more in a year in Federal awards. See [2 CFR 200.501](#).

The Form SF-SAC and the Single Audit Reporting packages for fiscal periods ending on or after January 1, 2008 are submitted online, as follows:

1. Create the recipient's online report ID at:
<http://harvester.census.gov/fac/collect/ddeindex.html>;
2. Complete the Form SF-SAC;
3. Upload the Single Audit;
4. Certify the Submission; and
5. Click "Submit."

Organizations expending less than \$750,000 a year are not required to have an annual audit for that year but must make their grant-related records available to NRC or other designated officials for review or audit.

III. Programmatic Requirements

The recipient is responsible for providing documentation to the NRC that tracks each student's progress in achievement of the academic program for which federal funds were provided. This includes: (1) ensuring the service agreement is signed by the student prior to providing support; (2) providing the NRC with student contact information upon student entry into the program, upon completion or withdrawal from the program, and upon request by the NRC; and (3) monitoring the student's fulfillment of the service agreement for the duration of the award. The NRC shall be notified immediately if a student is not fulfilling the academic program or the service agreement.

Grant Performance Metrics

The Office of Management and Budget requires all Federal Agencies providing funding for educational scholarships and fellowships as well as other educational related funding to report on specific metrics. These metrics are part of the Academic Competitiveness Council's (ACC) 2007 report and specifically relates to Science, Technology, Engineering, and Mathematics (STEM) curricula.

As part of the OMB requirements indicated above (for metric reporting), the recipient shall address the following questions and submit responses with the required progress reports:

Fellowship Metrics:

1. How many graduate students have been sponsored by NRC funding?
 - a. Response is the number of students, for this reporting period and cumulative to the grant.
2. How many students, supported by NRC funding, have received M.S. or equivalent degrees?
 - a. Response is the number of students, for this reporting period and cumulative to the grant.
3. How many students, supported by NRC funding, have received Ph.D. or equivalent degrees?
 - a. Response is the number of students, for this reporting period and cumulative to the grant.
4. How many students, supported by NRC funding, have accepted a job and are employed in the nuclear industry?

- a. Response is the number of students, for this reporting period and cumulative to the grant.
5. How many items have students produced, for example, Professional Journal articles, publications, patents, or conference reports?
 - a. Response is the type and number of items (not a bibliography), for this reporting period and cumulative to the grant.

As part of the PPR, include the following information for each student supported under this award:

1. Student Name
2. Years of Support
3. Cumulative Support in Dollars
4. Estimated Graduation Date
5. Status
6. Up to date student contact information (mailing address, telephone/cell phone, email address) for students no longer participating in the program, i.e. transferred programs, graduated, withdrew, etc.
7. Up to date student contact information, for all students at time of grant expiration, i.e. Final PPR.

Examples of status could be:

“Employed in Nuclear Industry”, if so, where;
“Looking for employment”, if so, how long;
“Deferred due to continuing education”, if so, what degree;
“Employed by Non-Nuclear”, if so, where; and
“Dropped out of program”

Unsatisfactory Performance

Failure to perform the work in accordance with the terms of the award and maintain at least a satisfactory performance rating may result in designation of the Recipient as high risk and the assignment of special award conditions. Further action may be required as specified in the standard term and condition entitled “Remedies for Noncompliance.”

Failure to comply with the award provisions may result in a negative impact on future NRC funding. In addition, the Grants Officer may withhold payments; change the method of payment from advance to reimbursement; impose special award conditions; suspend or terminate the grant.

Other Federal Awards With Similar Programmatic Activities

The Recipient will immediately notify the Project Officer and the Grants Officer in writing if after award, other financial assistance is received to support or fund any portion of the program description stated in the NRC award. NRC will not pay for costs that are funded by other sources.

Prohibition Against Assignment By The Recipient

The Recipient will not transfer, pledge, mortgage, or otherwise assign the award, or any interest to the award, or any claim arising under the award, to any party, banks, trust companies, or other financing or financial institutions without the written approval of the Grants Officer.

Site Visits

The NRC, through authorized representatives, has the right to make site visits to review project accomplishments and management control systems and to provide technical assistance as required. If any site visit is made by the NRC on the premises of the Recipient or contractor under an award, the Recipient shall provide and shall require his/her contractors to provide reasonable access to all facilities and provide necessary assistance for the safety and convenience of the Government representative in the performance of his/her official duties.

IV. Additional Requirements

Criminal and Prohibited Activities

The Program Fraud Civil Remedies Act ([31 U.S.C. §§ 3801-3812](#)), provides for the imposition of civil penalties against persons who make false, fictitious, or fraudulent claims to the Federal government for money (including money representing grant/cooperative agreements, loans, or other benefits).

False statements ([18 U.S.C. § 287](#)), provides that whoever makes or presents any false, fictitious, or fraudulent statements, representations, or claims against the United States shall be subject to imprisonment of not more than five years and shall be subject to a fine in the amount provided by 18 USC §287.

False Claims Act ([31 U.S.C. § 3729 et seq.](#)), provides that suits under this Act can be brought by the government, or a person on behalf of the government, for false claims under federal assistance programs.

Copeland "Anti-Kickback" Act ([18 U.S.C. § 874](#)), prohibits a person or organization engaged in a federally supported project from enticing an employee working on the project from giving up a part of his compensation under an employment contract.

American-Made Equipment and Products

Recipients are encouraged to purchase American-made equipment and products with funding provided under this award.

Increasing Seat Belt Use in the United States

E.O. 13043, amended by E.O. 13652, requires Recipients to encourage employees and contractors to enforce on-the-job seat belt policies and programs when operating company-owned, rented or personally-owned vehicle.

Federal Leadership of Reducing Text Messaging While Driving

E.O. 13513 requires Recipients to encourage employees, sub-awardees, and contractors to adopt and enforce policies that ban text messaging while driving company-owned, rented vehicles or privately owned vehicles when on official Government business or when performing any work for or on behalf of the Federal Government.

Federal Employee Expenses

Federal agencies are barred from accepting funds from a Recipient to pay transportation, travel, or other expenses for any Federal employee unless specifically approved in the terms of the award. Use of award funds (Federal or non-Federal) or the Recipient's provision of in-kind goods or services, for the purposes of transportation, travel, or any other expenses for any Federal employee may raise appropriation augmentation issues. In addition, NRC policy prohibits the acceptance of gifts, including travel payments for Federal employees, from Recipients or applicants regardless of the source.

Minority Serving Institutions (MSIs) Initiative

Pursuant to E.O.s 13230 and 13270, [amended by E.O. 13316](#) and [13385](#), 13532, 13592, 13555, 13515, and 13621, NRC is strongly committed to broadening the participation of MSIs in its financial assistance program. NRC's goals include achieving full participation of MSIs in order to advance the development of human potential, strengthen the Nation's capacity to provide high-quality education, and increase opportunities for MSIs to participate in and benefit from Federal financial assistance programs. NRC encourages all applicants and Recipients to include meaningful participations of MSIs. Institutions eligible to be considered MSIs are listed on the Department of Education website: <http://www.ed.gov/about/offices/list/ocr/edlite-minorityinst.html>

Research Misconduct

Scientific or research misconduct refers to the fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results. It does not include honest errors or differences of opinions. The Recipient organization has the primary responsibility to investigate allegations and provide reports to the Federal Government. Funds expended on an activity that is determined to be invalid or unreliable because of scientific misconduct may result in a disallowance of costs for which the institution may be liable for repayment to the awarding agency. The Office of Science and Technology Policy at the White House published in the Federal Register on December 6, 2000, a final policy that addressed research misconduct. The policy was developed by the National Science and Technology Council ([65 FR 76260](#)). The NRC requires that any allegation be submitted to the Grants Officer, who will also notify the OIG of such allegation. Generally, the Recipient organization shall investigate the allegation and submit its findings to the Grants Officer. The NRC may accept the Recipient's findings or proceed with its own investigation. The Grants Officer shall inform the Recipient of the NRC's final determination.

Publications, Videos, and Acknowledgment of Sponsorship

Publication of the results or findings of a research project in appropriate professional journals and production of video or other media is encouraged as an important method of recording and reporting scientific information. It is also a constructive means to expand access to federally funded research. The Recipient is required to submit a copy to the NRC and when releasing information related to a funded project include a statement that the project or effort undertaken was or is sponsored by the NRC. The Recipient is also responsible for assuring that every publication of material (including Internet sites and videos) based on or developed under an award, except scientific articles or papers appearing in scientific, technical or professional journals, contains the following disclaimer:

"This **[report/video]** was prepared by **[Recipient name]** under award **[number]** from **[name of operating unit]**, Nuclear Regulatory Commission. The statements, findings, conclusions, and recommendations are those of the author(s) and do not necessarily reflect the view of the **[name of operating unit]** or the US Nuclear Regulatory Commission."

Trafficking In Victims Protection Act Of 2000 (as amended by the Trafficking Victims Protection Reauthorization Act of 2003)

Section 106(g) of the Trafficking In Victims Protection Act Of 2000 (as amended as amended, directs on a government-wide basis that:

“...any grant, contract, or cooperative agreement provided or entered into by a Federal department or agency under which funds are to be provided to a private entity, in whole or in part, shall include a condition that authorizes the department or agency to terminate the grant, contract, or cooperative agreement, without penalty, if the recipient or any subrecipient, or the contractor or any subcontractor (i) engages in severe forms of trafficking in persons or has procured a commercial sex act during the period of time that the grant, contract, or cooperative agreement is in effect, or (ii) uses forced labor in the performance of the grant, contract, or cooperative agreement.” (See 22 U.S.C. §7104(g).)

EXECUTIVE COMPENSATION REPORTING

2 CFR § 170.220 directs agencies to include the following text to each grant award to a non-federal entity if the total funding is \$25,000 or more in Federal funding.

Reporting Subawards and Executive Compensation.

a. Reporting of first-tier subawards.

1. *Applicability.* Unless you are exempt as provided in paragraph d. of this award term, you must report each action that obligates \$25,000.00 or more in Federal funds that does not include Recovery funds (as defined in section 1512(a)(2) of the American Recovery and Reinvestment Act of 2009, Pub. L. 111–5) for a subaward to an entity (see definitions in paragraph e. of this award term).

2. *Where and when to report.*

i. You must report each obligating action described in paragraph a.1. of this award term to <http://www.fsrs.gov>.

ii. For subaward information, report no later than the end of the month following the month in which the obligation was made. (For example, if the obligation was made on November 7, 2010, the obligation must be reported by no later than December 31, 2010.)

3. *What to report.* You must report the information about each obligating action that the submission instructions posted at <http://www.fsrs.gov> specify.

b. Reporting Total Compensation of Recipient Executives.

1. *Applicability and what to report.* You must report total compensation for each of your five most highly compensated executives for the preceding completed fiscal year, if—

i. the total Federal funding authorized to date under this award is \$25,000.00 or more;

ii. in the preceding fiscal year, you received—

(A) 80 percent or more of your annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at [2 CFR § 170.320](#) (and subawards); and

(B) \$25,000,000 or more in annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at [2 CFR § 170.320](#) (and subawards); and

iii. The public does not have access to information about the compensation of the executives through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 ([15 U.S.C. 78m\(a\), 78o\(d\)](#)) or section 6104 of the Internal Revenue Code of 1986. (To determine if the public has access to the compensation information, see the U.S. Security and Exchange Commission total compensation filings at <http://www.sec.gov/answers/execomp.htm>.)

2. *Where and when to report.* You must report executive total compensation described in paragraph b.1. of this award term:

i. As part of your registration profile at <http://www.sam.gov>.

ii. By the end of the month following the month in which this award is made, and annually thereafter.

c. *Reporting of Total Compensation of Subrecipient Executives.*

1. *Applicability and what to report.* Unless you are exempt as provided in paragraph d. of this award term, for each first-tier subrecipient under this award, you shall report the names and total compensation of each of the subrecipient's five most highly compensated executives for the subrecipient's preceding completed fiscal year, if—

i. in the subrecipient's preceding fiscal year, the subrecipient received—

(A) 80 percent or more of its annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at [2 CFR § 170.320](#) (and subawards); and

(B) \$25,000,000 or more in annual gross revenues from Federal procurement contracts (and subcontracts), and Federal financial assistance subject to the Transparency Act (and subawards); and

ii. The public does not have access to information about the compensation of the executives through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 ([15 U.S.C. 78m\(a\), 78o\(d\)](#)) or section 6104 of the Internal Revenue Code of 1986. (To determine if the public has access to the compensation information, see the U.S. Security and Exchange Commission total compensation filings at <http://www.sec.gov/answers/execomp.htm>.)

2. *Where and when to report.* You must report subrecipient executive total compensation described in paragraph c.1. of this award term:

i. To the recipient.

ii. By the end of the month following the month during which you make the subaward. For example, if a subaward is obligated on any date during the month of October of a given year (*i.e.*, between October 1 and 31), you must report any required compensation information of the subrecipient by November 30 of that year.

d. *Exemptions*

If, in the previous tax year, you had gross income, from all sources, under \$300,000.00, you are exempt from the requirements to report:

i. Subawards,

and

ii. The total compensation of the five most highly compensated executives of any subrecipient.

e. *Definitions*. For purposes of this award term:

1. *Entity* means all of the following, as defined in 2 CFR Part 25:

i. A Governmental organization, which is a State, local government, or Indian tribe;

ii. A foreign public entity;

iii. A domestic or foreign nonprofit organization;

iv. A domestic or foreign for-profit organization;

v. A Federal agency, but only as a subrecipient under an award or subaward to a non-Federal entity.

2. *Executive* means officers, managing partners, or any other employees in management positions.

3. *Subaward*:

i. This term means a legal instrument to provide support for the performance of any portion of the substantive project or program for which you received this award and that you as the recipient award to an eligible subrecipient.

ii. The term does not include your procurement of property and services needed to carry out the project or program (for further explanation, see Sec. __.210 of the attachment to OMB Circular A-133, "Audits of States, Local Governments, and Non-Profit Organizations")

iii. A subaward may be provided through any legal agreement, including an agreement that you or a subrecipient considers a contract.

4. *Subrecipient* means an entity that:

- i. Receives a subaward from you (the recipient) under this award; and
- ii. Is accountable to you for the use of the Federal funds provided by the subaward.

5. *Total compensation* means the cash and noncash dollar value earned by the executive during the recipient's or subrecipient's preceding fiscal year and includes the following (for more information see [17 CFR § 229.402\(c\)\(2\)](#)):

i. *Salary and bonus.*

ii. *Awards of stock, stock options, and stock appreciation rights.* Use the dollar amount recognized for financial statement reporting purposes with respect to the fiscal year in accordance with the Statement of Financial Accounting Standards No. 123 (Revised 2004) (FAS 123R), Shared Based Payments.

iii. *Earnings for services under non-equity incentive plans.* This does not include group life, health, hospitalization or medical reimbursement plans that do not discriminate in favor of executives, and are available generally to all salaried employees.

iv. *Change in pension value.* This is the change in present value of defined benefit and actuarial pension plans.

v. *Above-market earnings on deferred compensation which is not tax-qualified.*

vi. Other compensation, if the aggregate value of all such other compensation (e.g., severance, termination payments, value of life insurance paid on behalf of the employee, perquisites or property) for the executive exceeds \$10,000.00.
