Open Phase Condition

The staff announced an upcoming meeting tentatively scheduled for August 2, 2017, to discuss the Temporary Instruction (TI) to inspect the implementation of NEI's open phase condition (OPC) voluntary industry initiative (VII) Revision 1. The staff plans to make both the draft TI and technical evaluation available to the public to facilitate a thorough discussion approximately two weeks before the scheduled meeting. Staff conveyed that the TI will be implemented in two parts. The first being information collection to support closure of Bulletin 2012-01 and the second being the inspection of the implementation of the OPC VII. Industry stakeholders raised concerns regarding the verification being planned as an inspection versus an audit. Also, many do not expect that their plants will be in the operational mode by the time the TI begins. The staff will consider the feedback while finalizing the TI.

The next ROP WG public meeting is scheduled to be held on July 13, 2017.
