

If conditions, which are adverse to quality and which require prompt action, are found by Quality personnel at the site or Station and required corrective measures can not be agreed upon, the Manager of Quality Assurance or his designated alternate, will be notified promptly.

The Director of Quality Assurance (Engineering-Construction), the Director of Quality Assurance (Operating) and the Quality Assurance Supervisor (Maintenance) report directly to the Manager of Quality Assurance. The Director of Quality Assurance (Engineering-Construction) has responsibility for administering design, procurement and construction quality assurance activities; the Director of Quality Assurance (Operating) has responsibility for administering operating quality assurance activities; and Quality Assurance Supervisor (Maintenance) has responsibility for quality assurance activities covering maintenance, modification, in-service inspection and Stores activities. They have authority and organizational freedom to identify problems and to initiate, recommend or provide solutions. The Quality Assurance organization is independent of the groups and individuals directly responsible for performing specific activities to which such quality assurance is applicable.

The qualification requirements for the position of Manager of Quality Assurance includes having a broad background and working knowledge of nuclear plant engineering, construction and operating activities within Commonwealth Edison Company as well as functional interfaces with working organizations outside the company plus having executive capabilities to achieve goals and objectives in concert with company policies. Also, required is knowledge of Quality Assurance regulations, policies, practices and Standards and experience working in Quality Assurance or related activity in reactor design, construction or operation or in a similar high technology industry. Educational requirements include, as a minimum, a baccalaureate degree or equivalent in Engineering or related science. The Manager of Quality Assurance shall have four (4) years experience in the field of quality assurance, or equivalent number of years of nuclear plant experience in a supervisory position preferably at an operating nuclear plant or a combination of the two. At least one (1) year of this four years experience shall be nuclear power plant experience in the implementation of the quality assurance program. 11

Job requirements for the positions of the Directors of Quality Assurance and Quality Assurance Supervisor (Maintenance) include having a broad background and working knowledge of engineering, construction and operating activities within Commonwealth Edison Company as well as having a knowledge of codes and standards applicable to power plant design, construction and operation and quality assurance principles. They also shall have supervisor and management qualities and capabilities. Educational requirements shall include a baccalaureate degree or equivalent in engineering or an equivalent technical discipline.

The Vice President (Licensing, Construction, Production, Nuclear Engineering and Environmental Affairs) directs the activities of departments responsible for licensing, construction, construction testing, plant operations, nuclear engineering and environmental affairs.
