Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Steam Generator Repair

This letter is to inform you that Florida Power & Light Company has decided to commence the repair of the Turkey Point Unit 4 steam generators in October, 1981 with extensive mobilization of the repair work force beginning in August, 1981. The repair of the Unit 3 steam generators will follow the Unit 4 repairs and is now scheduled to commence in October, 1982.

Implementation of the decision to commence the steam generator repair in October, 1981 is contingent upon the timely issuance by the Nuclear Regulatory Commission of an operating license amendment authorizing the repair. Consequently, it is necessary that the proceedings before the Atomic Safety and Licensing Board relative to the issuance of the amendment be conducted on a schedule which will permit their completion in advance of that date.

At this time the proceedings are being delayed pending the issuance of an Environmental Impact Statement. It would therefore be appreciated if the Staff would begin to prepare the Environmental Impact Statement promptly so that the proceedings can go forward.

Please feel free to call me if you should have any question in this matter.

Very truly yours,

Robert E. Unfig
Vice President
Advanced Systems & Technology
