Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: Dresden Station Units 2 and 3  
Quad Cities Station Units 1 and 2  
Response to Request for Information  
Concerning Scram Systems  
NRC Docket Nos. 50-237/249 and  
50-254/265

Reference (a): D. G. Eisenhut letter to All BWR Licensees  
dated October 1, 1980.

Dear Mr. Eisenhut:

In accordance with the request for information provided in  
Reference (a), the following information is provided:

1. No formal reassessment of the present scram system to confirm conformance with the applicable General Design Criteria (Appendix A to 10 CFR 50) has been performed to date. At the time of FSAR review and granting of the original license, the system was considered to meet the intent of the General Design Criteria. No additional reviews have been performed which would alter this conclusion.
- 2) We intend to reevaluate our present Scram System and modify it as necessary to meet the design and performance criteria developed by the Owners Sub-Group.
- 3) It is our intent to provide by 12-15-80 the results of the reevaluation and the schedule of implementation.

Please address any questions concerning this matter to this  
office.
