Mr. Linn,

I am writing in response to your voicemail from earlier today. I also had a brief conversation with one of your students and I let him know that I would be responding to you. I will also attempt to follow-up with a phone call when I am able.

I understand that you are currently teaching summer school classes for ESL (English as a second language) in Franklin Township, NJ. I also understand that you and your students have an interest in the NRC, nuclear power and the damage to the nuclear power reactors at the Fukushima Dai-ichi facility due to a 9.0-magnitude earthquake that struck Japan and was followed by a 45-foot tsunami on March 11, 2011.

I further understand that you and your students may be interested in writing letters to the NRC.

I will let you know that our website has an extensive array of publicly available information and can be found at the following web address: www.nrc.gov.

You and your students may find our "Student Corner" page to be of particular interest. It can be accessed here: <https://www.nrc.gov/reading-rm/basic-ref/students.html>

Information about the USNRC, including our mission and how we regulate radioactive materials for beneficial civilian purposes, can be found here: <https://www.nrc.gov/about-nrc.html>

You can find lessons learned from the Japan event here: <https://www.nrc.gov/reactors/operating/ops-experience/japan-dashboard.html>

Information regarding contacting the NRC is available here: <https://www.nrc.gov/about-nrc/contactus.html>

If the above links do not get you the information or contacts that you are seeking, please feel free to contact Mr. Richard Barkley of my staff at the following phone number: 610-337-5328. Alternatively, you may call or email me using the information below.

Please be aware that our standard practice is to place any incoming correspondence and our reply (including this email) into the agency's public records system (ADAMS). You can search ADAMS at the following web address: <https://www.nrc.gov/reading-rm/adams.html>

Sincerely,

Fred Bower
