Mr. Darrell G. Eisenhut, Director
 Division of Licensing
 U.S. Nuclear Regulatory Commission
 Washington, DC 20555

Subject: Dresden Station Units 2 and 3
 Quad Cities Station Units 1 and 2
 Zion Station Units 1 and 2
 Postponement of Certain NRC
 Requested Actions
 NRC Docket Nos. 50-237/249, 50-254/265
 and 50-295/304

Reference (a): July 25, 1980, letter to D. G. Eisenhut
 from C. Reed.

Dear Mr. Eisenhut:

Reference (a) discussed several NRC requested activities at the subject facilities which we planned to postpone, and the letter provided a justification for the postponements. Since July, 1980 there have been changes which have affected the commitments in the referenced correspondence.

Following is an item by item status report of the postponed activities.

1. TMI studies resulting from your letter dated May 7, 1980. Our current commitments and schedules for these studies are discussed in a letter to D. G. Eisenhut from J. S. Abel dated December 15, 1980; Subject: Confirmation of NUREG-0737 Implementation Dates and Justification of Delays. In summary, our commitments are the following:

Control Room Habitability (NUREG-0737, III.D.3.4)
 A 12-month postponement was requested.

HPCI/RCIC Space Cooling (NUREG-0737, II.K.3.24)
 No modifications proposed and no postponement requested.

Separate HPCI/RCIC Initiation (NUREG-0737, III.K.3.13)
 Modification proposed for Quad Cities and no postponement requested.

Performance of Isolation Condenser (NUREG-0737, II.K.3.29)
Postponement to April 1, 1982 requested for Dresden.

Automatic PORV Isolation System (NUREG-0737, III.K.3.1&2)
Postponement requested for owners group report applicable to Zion Station.

Since the postponement of these activities are now documented in our reply to NUREG-0737, no further action on the referenced letter is necessary.

2. IE Bulletin 80-11 - Masonry Wall Design Studies.

For Zion Station the review of this bulletin is underway. The analyses and report were submitted to the NRC on November 6, 1980, and any modifications will be completed in accordance with schedules provided in the November 6, 1980 submittal.

For Dresden and Quad Cities stations the requirements of this bulletin were postponed in accord with the referenced letter. Complete analysis and report - November, 1981.

3. Dresden Unit 2 Systematic Evaluation Program study to review the potential for system interactions due to seismic loads. Postponed in accord with the referenced letter.

4. IE Bulletin 79-14, "Seismic Analysis for As-Built Safety Related Piping Systems". Study for Dresden Units 2 and 3 and Quad Cities Units 1 and 2.

After further evaluation, the actions required by this Bulletin will not be postponed.

With the above listed changes, only a portion of item 2 and item 3 are being postponed in accordance with the referenced letter. The other items will be completed in accordance with current commitments or any delays are being pursued by separate correspondence, i.e., NUREG-0737 commitments.

If you have any questions or comments, please contact me.

Very truly yours,

C. Reed
