July 13, 2017

Cammenga and Associates, LLC
ATTN: Christopher Karchon
Director of Strategic Initiatives
2011 Bailey St.
Dearborn, MI 48124

SUBJECT: U.S. NUCLEAR REGULATORY COMMISSION PARTIAL APPROVAL OF
CAMMENGA AND ASSOCIATES, LLC REQUEST FOR WITHHOLDING
INFORMATION FROM PUBLIC DISCLOSURE

Dear Mr. Karchon:

Cammenga and Associates, LLC (Cammenga) submitted an affidavit dated March 27, 2017, executed by Mr. Bill Kooiman, requesting that the information provided in application dated March 27, 2017, to amend Sealed Source and Device registration certificate and Exempt Distribution License, be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390.

The affidavit stated that per §2.390(b)(4), Cammenga is requesting that all of the information be withheld from public disclosure for the following reasons: (1) the proprietary information is the property of Cammenga and has not been made available to the public. The proprietary information has been held in confidence by Cammenga since its inception and continues to remain confidential; (2) the proprietary information is of a type customarily held in confidence by Cammenga; (3) the proprietary information is neither available in public sources nor generally known in the public domain. After careful and extensive research, Cammenga found no comparable methodologies or patentable processes. Thereafter, Cammenga classified its developments as trade secrets and held the proprietary information as proprietary and as trade secret; and (4) public disclosure of the proprietary information is highly likely to cause substantial harm to Cammenga's competitive position because it will permit competitors to create similar products and either reduce or foreclose future business opportunities.

Accordingly, we have concluded that most of the information sought to be withheld from public disclosure does not meet the requirements of 10 CFR 9.17 and 10 CFR 2.390. Therefore, your request to withhold the application dated March 27, 2017, in its entirety is denied. However, the drawings marked proprietary for the gun sights titled "CAM1116FS", "CAM1117FS", "CAM1118FS", "CAM1119FS", "CAM1120RS", "CAM1121FS", "CAM1122RS", and the "PERIODIC REPORT OF TRANSFER," will be withheld from public disclosure pursuant to 10 CFR 9.17 and 10 CFR 2.390(a)(4) and Section 103(b) of the Atomic Energy Act of 1954, as amended. Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the U.S. Nuclear Regulatory Commission (NRC). You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified of the date of public disclosure, in advance which will be a reasonable time thereafter.

If you have any questions, please contact me at Tomas.Herrera@nrc.gov or (301) 415-7138.

Sincerely,

/RA/

Tomas Herrera, Team Leader
