Director of Nuclear Reactor Regulation  
 U.S. Nuclear Regulatory Commission  
 Washington, DC 20555

Subject: Dresden Station Unit 2  
 Proposed Amendment to  
 Appendix A, Technical Specifications  
 to Operating License DPR-19 to  
 Implement 10CFR50.59 Reload Licensing  
NRC Docket No. 50-237

Reference (a): R. F. Janecek letter to Director of Nuclear  
 Reactor Regulation dated January 28, 1981

Dear Sir:

Reference (a) provided our proposed amendment to Operating  
 License DPR-19 for Dresden Unit 2 which would allow future reloads  
 to be performed in accordance with the requirements of 10CFR50.59.

Additional review of our submittal of Reference (a)  
 indicates that some pages were inadvertently omitted and others  
 contained errors which were not detected prior to transmittal.  
 Enclosed for your use are revised pages 6, 7, 12, 42, 46, 62, 81B,  
 and 85B. Pages 12, 42, and 46 were listed on the revision sheet but  
 were apparently lost during copying. Pages 6, 7, 62, and 81B were  
 previously transmitted with minor errors not detected prior to  
 transmittal. Page 85B should have been included in the original  
 transmittal but was accidentally omitted. A revised list of page  
 changes is also included which includes page 85B.

Please address any questions concerning this matter to this  
 office.

Three (3) signed original and thirty-seven (37) copies of  
 this transmittal are provided for your use.

Very truly yours,

*Robert F. Janecek*
