Indian Point Station
Docket No. 50-247

Mr. Darrell G. Eisenhut, Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut,

Your July 31, 1980 letter to all licensees of operating plants provided the Commission's interim criteria for shift staffing. With the exception of the additional licensed reactor operator required by item "e" on page 2 of your letter, we presently meet your specified staffing criteria. With respect to this particular item, we expect to start a training class for reactor operator candidate on or about February 2, 1981. Upon completion of this class in early 1982, successful USNRC Licensing, and the prerequisite qualification training, we will be able to fully meet the interim staffing criteria no later than July 1, 1982.

Very truly yours,

cc: Mr. T. Rebelowski, Resident Inspector
