UNITED STATES OF AMERICA  
NUCLEAR REGULATORY COMMISSION

THE ATOMIC SAFETY AND LICENSING BOARD

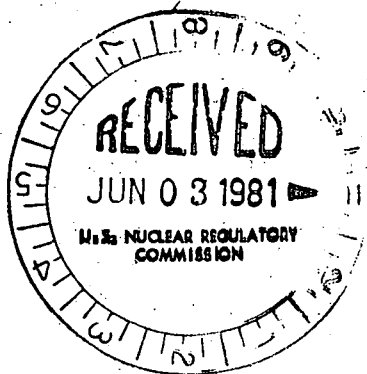

In The Matter Of	)	
COMMONWEALTH EDISON COMAPNY	)	Docket Nos. 50-237-SP
(Dresden Station, Units 1 and 2)	)	50-240-SP
	)	(Spent Fuel Pool Modification)
	)	247

Dear Administrative Judges:

Intervenor would like to make the following corrections to its Supplemental Findings of Fact filed on May 18, 1981:

p. 160 "4.454" should be 5.454.  
A convexity allowance should not have been added to the outside dimension at the spacer button.

p. 164-166 Applicant's Comment clarifies the point that Intervenor was making about channel side measurements. The percentage of channels with bow plus bulge for at least one side greater than X mils would be different than the percentage of channel sides with bow plus bulge greater than X mils. It is Intervenor's position that the percentage of channels with bow plus bulge for at least one side greater than X mils is the relevant number that should have been considered by Applicant.

Respectfully submitted,

PEOPLE OF THE STATE OF ILLINOIS

TYRONE C. FAHNER  
ATTORNEY GENERAL
