Paul O'Connor, Project Manager
 Operating Reactors
 U.S. Nuclear Regulatory Commission
 Washington, D.C. 20555

Subject: III-6, Seismic Design Considerations
 NRC Docket 50-237

Dear Mr. O'Connor:

Mr. Tom Cheng requested Commonwealth Edison to provide the ratings on the recirculation system pumps snubbers. The original hydraulic units have been replaced with mechanical units manufactured by Pacific Scientific. They are all size PSA-35.

The current Pacific Scientific load ratings for a PSA-35 snubber are:

<u>Service Level</u>	<u>Load Rating</u>
A&B	50,000 lbs.
C&D	72,450 lbs.

Please address any questions you may have concerning this matter to this office.

One (1) signed original and thirty-nine (39) copies of this transmittal have been provided for your use.

Very truly yours,

T.J. Rausch
