Mr. Darrell G. Eisenhut, Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Dresden Station Units 2 and 3
Quad Cities Station Units 1 and 2
Control of Heavy Loads, NUREG-0612
NRC Docket Nos. 50-237/249 & 50-254/265

References (a): E. D. Swartz letter to D. G. Eisenhut
dated May 4, 1982.

(b): D. M. Crutchfield letter to L. DelGeorge
dated May 7, 1982.

Dear Mr. Eisenhut:

On February 22, 1982, a telephone conference call was held between the NRC Staff, the Franklin Research Center (FRC) and the Commonwealth Edison Company to discuss the FRC draft Technical Evaluation Reports (TERs) concerning "Phase I" control of heavy loads at our Dresden and Quad Cities Stations.

Reference (b) requested that the Commonwealth Edison Company provide, within thirty (30) days, our understanding of the resolution of those items agreed upon during the conference call, and a firm schedular commitment for our resolution of the remaining open items.

As a result of our review of the draft TERs, and to document our conference call discussions, Reference (a) provided our response to each concern and recommendation that was identified by the FRC in their TERs.

Therefore, we believe our Reference (a) response should satisfy your Reference (b) request for information. In our judgment, no items remain open and our justification for closure of such items has been presented in Reference (a).
