Mr. Darrell G. Eisenhut, Director
 Division of Licensing
 U.S. Nuclear Regulatory Commission
 Washington, DC 20555

Subject: Dresden Station Units 2 and 3
 Quad Cities Station Units 1 and 2
 Safety Concerns Associated With
 Pipe Breaks in the BWR Scram System,
 NUREG-0803
NRC Docket Nos. 50-237/249 and 254/265

Reference (a): T. J. Rausch letter to D. Eisenhut
 dated January 25, 1982.

Dear Mr. Eisenhut:

Commonwealth Edison provided the Dresden Units 2 and 3 and Quad Cities 1 and 2 plant specific response to NUREG 0803 (concerning the integrity of BWR Scram System Piping) in Reference (a). In that response, it was stated that one third of all scram pilot valves on each unit are rebuilt every operating cycle at Dresden Station and one quarter of the scram pilot valves on each unit are rebuilt every operating cycle at Quad Cities Station.

This response should have stated that one quarter of the scram pilot valves on each unit are rebuilt every operating cycle at both Dresden and Quad Cities Stations. We regret any inconvenience that this correction may cause you.

Please direct any questions you may have concerning this matter to this office.

One (1) signed original and fifty-nine (59) copies of this transmittal are provided for your use.

Very truly yours,

Thomas J. Rausch
