Mr. Carl Berlinger, Chief  
Core Performance Branch  
Division of Systems Integration  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

SUBJECT: NRC Review Procedures for Jet Pump BWR Reload Submittals with Fuel  
and Analyses Supplied by Exxon Nuclear

Dear Mr. Berlinger:

The NRC Staff review and approval of the use of fuel and analyses supplied by Exxon Nuclear Company (ENC) for Cycle 8 operation of Dresden Unit 3 was the first for a jet pump BWR (JP-BWR). This review necessarily considered both generic and plant-specific issues. With the completion of this review, many of your conclusions will be directly applicable to JP-BWR's scheduled to operate with ENC fuel and analyses in the near future. Other items will have to be addressed on a plant-specific basis for each follow-on plant. The purpose of this letter is to request a meeting to present ENC's proposed plan for follow-on plant licensing.

We propose a meeting date of July 14, 1982 at the NRC Staff offices in Bethesda. Attendance by representatives of the Core Performance Branch and the Reactor Systems Branch and the Division of Licensing is suggested. We intend to invite to the meeting one or two representatives from each of our utility customers with a JP-BWR which will be operating in the near future with ENC fuel. A preliminary agenda is attached.

A detailed outline of the information we would plan to develop for each reactor and operating cycle will be provided to you by July 1. We would plan to review this outline with you at the meeting.

We would appreciate your early response to this request. If you have any questions regarding this matter, please feel free to call (509) 375-8639.

Sincerely,

J. C. Chandler  
Reload Fuel Licensing
