dated August 2, 1977.

Dear Mr. Denton:

Pursuant to 10 CFR 50.59, Commonwealth Edison proposes to amend Appendix A, Technical Specifications to Operating Licenses DPR-29 and DPR-30 for Quad Cities Units 1 and 2, respectively. These amendments incorporate numerous miscellaneous changes to section 6 of the Technical Specifications which pertain to administrative controls.

The majority of the changes reflect changes made in the corporate and station organizations as summarized below:

- (1) Division Manager Nuclear Stations is revised to Division Vice President Nuclear Stations (Numerous T.S. locations)
- (2) Title of Administrative Assistant is revised to Administrative and Support Services Assistant Superintendent (T.S. 6.1.D)

8302250212 830217
PDR ADOCK 05000237
PDR

Approved 3/40 w/check \$1,600

- (3) Reference to "Radiation Protection Manager" as the title of the position which the Rad-Chem Supervisor must meet (T.S. 6.1.D)
- (4) Add "Executive" to the title of the Vice President (Construction, Production and Engineering) (T.S. 6.1.G.1.a, 6.1.G.1.b.9)
- (5) Change Maintenance Engineer to Maintenance Assistant Superintendent (T.S. 6.2.C.1 and 6.2.C.2)
- (6) The Director of Nuclear Safety reports to the Chairman and President and he (a) appoints the supervisor of Offsite Review and Investigative Function and (b) has authority to order unit shutdown (T.S. 6.1.G.1 and 6.1.G.1.C)

A revised corporate and stations organization chart is now provided in one figure, Figure 6.1-1. The shift manning chart then becomes Figure 6.1-2. In addition, section 6.2.A is being revised to require procedures for the control of overtime for the Shift Engineer, Station Control Room Engineer, Shift Foreman, and Nuclear Station Operator job classifications. This change is being made in response to the Reference (b) request (Generic Letter 82-12) which is related to NUREG 0737 item I.A.1.3.

Paragraph 6.1.F is also being revised to clarify the applicability of the requirement to conduct retraining at two year intervals. This change should alleviate concerns raised in a recent Region III Dresden Management Audit, and is consistent with our Reference (c) commitments.

Technical Specification paragraph 6.2.E now more appropriately specifies that emergency procedure drills shall be conducted at the frequency specified in the Generating Stations Emergency Plan (GSEP). This will bring the station practice into accord with NUREG 0654, Revision 1.

In response to Generic Letters 82-17 and 82-23 (References (d) and (e)), paragraphs 6.1.G.1.b(5) and (6) are being revised to require audits of the Facility Emergency Plan and Facility Security Plan at least once per 12 months.

Paragraph 6.1.D is being revised to repeat a clarification of the Radiation/Chemical Technicians qualification requirements which we proposed earlier in Reference (f).

The proposed changes, which have received On-Site and Off-Site review and approval, are provided in the attachment to this letter. For increased clarity, new pages are provided for all of sections 6.1, 6.2, 6.3 and 6.4.

H. R. Denton

February 17, 1983

We have reviewed 10 CFR 170 and have determined that this request constitutes a combined Class I and Class II request. As such, a fee remittance of \$1600 is enclosed.

Please address any questions you may have concerning this matter to this office.

Three (3) signed originals and thirty-seven (37) copies of this transmittal are provided for your use.

Very truly yours,

Thomas J. Rausch
