Dear Mr. Keppler:

Attached are the following listed revised pages dated 9-9-93, Rev. 25 to the subject Topical Report describing the Commonwealth Edison Quality Assurance Program.

Pages: 1-6, 1-7, 1-10, 1-12, 11-3

The revisions reflect the provision for transfer of engineering and construction responsibilities from Project Engineering and Project Construction to Station Nuclear Engineering and Station Construction, respectively, upon issuance of a full power operating license and with mutual agreement between the Manager of Projects and the Vice-President of Nuclear Operations.

The changes do not reduce the commitments in the previously accepted Quality Assurance Program and are therefore being implemented.

Respectively,

P. L. Barnes
