Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Dresden Station Units 2 and 3
TMI Action Item II.K.3.30 and 31
NRC Docket Nos. 50-237 and 50-249

Reference (a): D. M. Crutchfield letter to D. L. Farrar
dated January 23, 1984.

Dear Mr. Denton:

We have reviewed the referenced letter and concur with the opinion of the NRC staff that the requirements of TMI Items II.K.3.30 and 31 have been met for Dresden Units 2 and 3. The updated FSAR scheduled for June 1984 will document the reasons no new small break loss of coolant analysis was required following the addition of Exxon fuel into the Dresden units.

If you have any questions regarding this matter, please direct them to this office.

One signed original and forty (40) copies of this transmittal are provided for your use.

Very truly yours,

B. Rybak
Nuclear Licensing Administrator
