Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Dresden Station Units 2 and 3
Proposed Amendment to DPR-19 & 25
Radiological Effluent Technical
Specifications (RETS)
NRC Docket Nos. 50-237 and 50-249

References (a): Cordell Reed letter to Director of NRR
dated February 16, 1979.

(b): B. Rybak letter to H. R. Denton
dated January 12, 1984.

Dear Mr. Denton:

Pursuant to 10 CFR 50.59, Commonwealth Edison proposes to amend Appendix A, Technical Specification (TS) to Dresden Station Units 2 and 3 Operating Licenses DPR-19 and DPR-25, respectively. These amendments, Attachments 1 and 2 to this letter, proposes changes to the Technical Specifications and Bases to incorporate Radiological Effluent Technical Specifications (RETS) which would meet the requirements of Appendix I to 10 CFR Part 50. The amendments would approval new Technical Specification sections defining limiting conditions for operation and surveillance requirements for radioactive liquid and gaseous effluent monitoring, for effluent concentrations and for treatment of liquid, gaseous and solid wastes. These amendments will also incorporate into the Technical Specification the bases that support the operation and surveillance requirements.

These proposed changes have received On-Site and Off-Site review and approval. This is a revision to a previous draft submittal transmitted per Reference (b) and incorporates comments made by your staff and its consultants in subsequent discussions. Commonwealth Edison feels this revised submittal meets both your staff and consultant's concerns and, therefore, is submitting this as a proposed change to the Technical Specifications.

We have reviewed these amendment requests and find that no significant hazards consideration exists. Our review is documented in Attachment 4.

AOO!
1/1

Due to the magnitude and number of requirements this proposed Technical Specification would impose on Dresden Station we request that, if accepted as is, this proposed Amendment be made effective 6 months after NRC approval. This is necessary to allow us sufficient time to implement all the changes necessary to be in full compliance.

Please address any questions you may have regarding this matter to this office.

Three (3) signed originals and thirty-seven (37) copies of this letter are provided for your use. Due to the size of the Attachments, only five (5) copies have been submitted.

Very truly yours,

B. Rybak
Nuclear Licensing Administrator
