Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Dresden Station Units 2 and 3
Supplement to Proposed Amendment
to Technical Specification for
Facility Operating License Nos.
DPR-19 and DPR-25
NRC Docket No. 50-237 and 50-249

Reference (a): B. Rybak letter to H. R. Denton dated
February 17, 1983.

Dear Mr. Denton:

Per the referenced letter, Commonwealth Edison proposed to amend Section 6 of Appendix A, to the Technical Specifications, for Facility Operating Licenses DPR-19 and 25. During the review of that submittal the NRC had suggested several changes. Additionally, a revision to 10 CFR Sections 50.72 and 50.54 and a new Section 50.73 all effective January 1, 1984 have since been issued which revised the minimum licensed operator staffing, immediate notification requirements and Licensee Event Report System respectively. Therefore we are updating our amendment request to reflect these changes. The changes submitted herein are pursuant to the reporting requirements of Sections 50.72 and 50.73 of 10 CFR Part 50 and were prepared using the guidance provided in Generic Letter No. 83-43.

The proposed change are enclosed in Attachment A. The attached changes have been received both Onsite and Offsite review and approval. We have reviewed this amendment request and find that no significant hazards consideration exists. Our review is documented in Attachment B. Commonwealth Edison is notifying the State of Illinois of our request of this amendment by transmittal of a copy of this letter and its attachments to the designated State Official.
