Docket Nos. 50-445-184
50-446-182

COMANCHE PEAK STEAM ELECTRIC STATION
CADWELD TEST SPECIMEN REBAR FAILURE
FILE NO. 10110

Dear Mr. Seidle:

On March 3, 1977, the TUGCO QA Manager notified Mr. Stewart of your staff of a rebar failure discovered during routine site activities related to the CPSES cadweld testing program. This item was identified as a possible reportable deficiency under the provisions of 10CFR50.55(e).

Subsequent investigations by the contractor's QA staff have led us to the determination that the incident was not reportable under the terms of the above referenced document.

Very truly yours,

R. J. Gary
