Dear Mr. Denton:

Per Reference (f), Commonwealth Edison submitted new versions of the Technical Specifications for Dresden Station Units 2 and 3. The Technical Specifications were revised into a new format, without changing their technical content. That submittal is currently undergoing NRC review and may soon be approved. A number of proposed changes to the Technical Specifications for both units have been submitted previously and they also are under NRC review.

By this letter, we are submitting five of those previous amendment requests (References (a) thru (e)) in this new format in order not to delay their review and approval. The only changes, beside the reformatting, incorporates comments received from the NRC. Therefore, it is our belief that our previous decisions that no significant hazards considerations exist still stands for all these amendments.
