Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: Dresden Station Units 2 and 3  
Proposed Technical Specification  
Changes Mobile Volume Reduction  
System (MVRS)  
NRC Docket Nos. 50-237 and 50-249

Reference (a): B. Rybak to H.R. Denton letter dated  
November 7, 1984

Dear Mr. Denton:

Per the referenced letter, Commonwealth Edison requested approval for the use of a mobile volume reduction system at Dresden Station. In support of that application, we are submitting proposed changes to Appendix A of the Technical Specifications for Dresden Station Units 2 and 3. These proposed changes lists the MVRS's effluent monitoring equipment in the appropriate Tables in Appendix A.

A summary of the proposed changes is provided in Attachment 1. The proposed Technical Specification changes are enclosed in Attachments 2 and 3 and have received both On-Site and Off-Site review and approval. We have reviewed this amendment request and find that no significant hazards consideration exists as documented in Attachment 4. Commonwealth Edison is notifying the State of Illinois of our request for this amendment by transmittal of a copy of this letter and its attachments to the designated State Official.

In accordance with 10 CFR 170, a fee remittance in the amount of \$150.00 is enclosed.

Please direct any questions you may have concerning this matter to this office.
