Reference: Letter from J. R. Wojnarowski to
D. M. Crutchfield dated August 1, 1985.

Dear Mr. Zwolinski:

The referenced letter transmitted a report documenting our plans for compliance with Reg. Guide 1.97 for Dresden Units 2 and 3. Page 16 of that report incorrectly states that the identification of post-accident monitoring instrumentation is being addressed in our Detailed Control Room Design Review. Identification of this instrumentation is being addressed as part of a Human Factors review of our integrated implementation of the NUREG 0737 Supplement 1 initiatives. Please correct your copies of the report. We apologize for the inconvenience.

Please direct any questions you may have regarding this matter to this office.

One signed original and forty (40) copies of this letter are provided for your use.

Very truly yours,

J. R. Wojnarowski
Nuclear Licensing Administrator
