to H. R. Denton.

(b): October 1, 1985 letter from J. A. Zwolinski  
to D. L. Farrar.

Dear Mr. Denton:

Commonwealth Edison Company submitted a Topical Report for NRC review and approval in Reference (a). This report, entitled "Requalification Program for Licensed Operators, Senior Operators, and Senior Operators (Limited)", was reviewed by the NRC Staff and documented in reference (b). Reference (b) stated that the proposed requalification program was deficient in three areas. Specifically, these concerns were;

1. CECO has not provided a program to ensure that each licensed individual will review the contents of all abnormal and emergency procedures on a regularly scheduled basis.
2. CECO's program does not contain the requirement that those individuals who exhibit deficiencies relative to written examinations be suspended from licensed duties during the time period between the publication of the examination results and the convening of the Review Board.
3. CECO's program does not include provisions for off-site licensed personnel to participate in the requalification program.

Attached is a revised Topical Report for NRC review. Changes have been made to Sections III.F, IV.A.4, and VI.A.1 to address the concerns discussed above.

One signed original and ten (10) copies of this letter and the enclosure are provided for your use.

Very truly yours,

P. C. LeBlond  
Nuclear Licensing Administrator
