November 26, 1985

Mr. J. A. Zwolinski, Chief  
Operating Reactors Branch No. 5  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: Dresden Station Units 2 and 3  
Submittal of Revised Procedures Generation Package  
NRC Docket Nos. 50-237 and 50-249

Reference: Letter from J. A. Zwolinski to D. L. Farrar  
dated July 31, 1985

Dear Mr. Zwolinski:

The purpose of this letter is to document your verbal authorization of a revised submittal date for Dresden Station's Revised Procedure Generation Package (PGP) per your discussion with Mr. R. Flessner (CECo/Dresden) on November 20, 1985. At that time, it was determined that due to unforeseen circumstances including the unavailability of the Station's lead reviewer of the PGP, an additional extension of the submittal date by two weeks would be needed.

On September 27, 1985, in a telephone conversation between Mr. R. Gilbert of your staff and myself, the original submittal date of November 3, 1985 (see reference), was extended by 30 days to allow for inclusion of some human factors considerations. With this additional extension authorization, the Dresden Station PGP will be submitted by December 16, 1985.

Sincerely,

J. R. Wojnarowski  
Nuclear Licensing Administrator

cc: R. Gilbert - NRR  
NRR Resident Inspector - Dresden
