TESTIMONY FOR THE MIDLAND HEARING

D. Whitesell participated in quality assurance inspections related to Cadwelding at the Midland plant. We anticipate that the question of what constitutes acceptable quality assurance practice for Cadwelding and whether or not RO has required more at the Midland site than that which is typical may become an issue. In order to be prepared to respond to such an issue, we request that D. Whitesell prepare written testimony that will respond to such an issue if necessary.
