Division of Licensing

SUBJECT: DAILY HIGHLIGHT - VIRGIL C. SUMMER NUCLEAR STATION, UNIT 1

Intervenor, Brett A. Bursey informed the ASLB today that a welder for Daniel Construction Company knew of 30 to 40 defective cadwelds in the containment. In a conference call today with the Board and parties Bursey requested that the Board stay its initial decision issued August 4, 1982. The Board did not rule but will hold another conference call with the parties on August 12, 1982 to permit the parties to study the welder's affidavit which will be made available by Bursey tomorrow.

This matter has received significant media attention in conjunction with Chairman Palladino's visit to the facility today.

Original signed by:  
William Kane
