Mr. Harold R. Denton, Director  
 Office of Nuclear Reactor Regulation  
 U.S. Nuclear Regulatory Commission  
 Washington, DC 20555

Subject: Dresden Station Units 2 and 3  
 Quad Cities Station Units 1 and 2  
 Status of Emergency Response Facilities  
 NUREG 0737 - Item III.A.1.2  
NRC Docket Nos. 50-237/249 and 50-254/265

Reference (a): June 12, 1984 D. B. Vassallo letter to D. L. Farrar  
 (b): June 12, 1984 D. M. Crutchfield letter to D. L. Farrar  
 (c): November 15, 1985 G. L. Alexander letter to H. R. Denton

Dear Mr. Denton:

The NRC Projects Managers for Dresden and Quad Cities Stations have requested the current status of Emergency Response Facilities for their respective stations. In particular they inquired about the Technical Support Center, Operational Support Center, Emergency Operations Facility and the meteorological upgrading.

These facilities have been declared operational; the installations have been completed subject to the following items.

1. Commonwealth Edison has submitted to the NRC the Human Factors Review and our plan to meet Regulatory Guide 1.97 in accordance with requirements contained in references (a) and (b). Any suggested modifications included in these reports or those which may result from the NRC review are not complete.
2. The NRC has made an inquiry about signal isolators used in the SPDS. SPDS is operational; however, we have not completed our response to the question.
3. The A-Model, which is related to the meteorological upgrade, was completed, but is now being redesigned. The schedule for implementing the new program is contained in reference (c).

Please contact this office if you or your staff have any further questions on this matter.

Sincerely,

Greg Alexander  
 Nuclear Licensing Administrator
