Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Dresden Station Units 2 and 3
Supplement to Proposed Technical
Specification Amendment -
Miscellaneous Changes
NRC Docket Nos. 50-237 and 50-249

Reference: Letter from J. R. Wojnarowski to H. R. Denton
dated January 20, 1986.

Dear Mr. Denton:

The referenced letter transmitted proposed Technical Specification amendments for Dresden Units 2 and 3 covering a variety of changes, primarily of an administrative/editorial nature. We have recently identified several additional changes of a similar nature. The additional changes are provided in Attachments 1 and 2 for Dresden Units 2 and 3, respectively, and are described in Attachment 3. These proposed changes are being submitted as a supplement to those requested in the reference.

These additional changes have received On-Site and Off-Site review and approval. Our analysis regarding No Significant Hazards Consideration, transmitted with the reference, has been updated as necessary to incorporate these additional items. The revised analysis is documented in Attachment 4.

Commonwealth Edison is notifying the State of Illinois of this supplemental request by transmittal of a copy of this letter and the attachments to the designated State Official.

Three (3) signed originals and thirty-seven (37) copies of this letter and the attachments are provided for NRC use.
