Mr. Harold R. Denton  
U.S. Nuclear Regulatory Commission  
Office of Nuclear Reactor Regulation  
Washington, DC. 20555

Subject: Dresden Station Units 2 and 3  
Revisions to Dresden Station Generating Station  
Emergency Plan (GSEP) Annex  
NRC Docket Nos. 50-237 and 50-249

Dear Mr. Denton:

Enclosed is a revision to the Dresden Station Generating Station Emergency Plan (GSEP) Annex. The revision was made to include a footnote to Table DA 5-1 for the Dresden Nuclear Power Station Emergency Action Levels. The footnote adds the words "unmonitored releases can be estimated by field measurements taken by environmental survey teams". This change addresses concerns identified as open item numbers 50-237/85013-01 and 50-249/85012-01.

This change has been reviewed in accordance with Commonwealth Edison procedures and has been approved by both on-site and off-site review.

Please update the manuals you have in your possession to include this new page in the GSEP Annex. Please direct any questions you may have regarding this matter to this office.

Very truly yours,

Irene M. Johnson  
Nuclear Licensing Administrator
