Mr. Harold R. Denton  
U.S. Nuclear Regulatory Commission  
Office of Nuclear Reactor Regulation  
Washington, DC. 20555

Subject: Dresden Station Units 2 and 3  
Quad Cities Station Units 1 and 2  
Proposed Amendment to Technical Specifications  
Concerning 10CFR 50, Appendix H-Metal Surveillance  
Capsule Program and Appendix G-Minimum  
Temperature Requirements  
NRC Docket Nos. 50-273 and 50-249  
and 50-254 and 50-265

Reference: (a) Letter from T.J. Rausch to H.R. Denton  
dated March 31, 1982 and related attachments

Dear Mr. Denton:

The above reference document requested revisions to Commonwealth Edison's Appendix A Technical Specifications to Operating Licenses DPR-19, DPR-25, DPR-29 and DPR-30 for Dresden Units 2 and 3 and Quad Cities Units 1 and 2, respectively. The purpose of the proposed change was to incorporate a 16 effective full power year (EFPY) sample into technical Specification Table 4.6.2 for the four units and to revise the expiration date of the Figure 3.6.1, Appendix G minimum temperature requirements.

Commonwealth Edison now requests to withdraw the March 31, 1982 application revising the Appendix G and H portions of the Dresden Units 2 and 3 and Quad Cities Units 1 and 2 technical specifications. We will be making a new submittal pertaining to these items sometime in the first quarter of 1987.

Pursuant to the NRC final rule amending communication procedures, we are submitting thirty-seven (37) copies of this letter for your use, as well as a copy to NRC Region III and the Dresden and Quad Cities Resident Inspectors.
