RE: Radiation Survey for Furnace 8- Request for additional information

Mr. Lawyer,

Enclosed is the additional information you requested on our phone call of last week relative to the Radiation Survey for Furnace 8 completed for the Fenton Art Glass facility located in Williamstown, West Virginia. Attachment:

1. Request for Information Furnace 8 FSS

The additional information documents that the survey was done properly. The survey demonstrates that the concrete around Furnace 8 is not impacted and the facility can be released for unrestricted use. The FSS also verifies that the furnace refractories coated with radioactive glass have been removed and transported to the appropriate treatment facilities.

We request that the facility be cleared for unrestricted use and/or demolition and that our license be terminated.

Respectfully submitted,

George W. Fenton
President
