Ms. Vonna Ordaz  
Director, Office of New Reactors  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

Subject: Notification of Changes to the Initial Test Program described in UFSAR Section 14 in Accordance With License Condition 2.D(7)(a)

In accordance with license condition 2.D(7)(a) of the Virgil C. Summer Nuclear Station (VCSNS) Units 2 and 3 Combined Licenses, Numbers NPF-93 and NPF-94, respectively, South Carolina Electric & Gas Company (SCE&G) is required to report, within 30 days, a change made to the Initial Test Program described in [Final Safety Analysis Report] FSAR Chapter 14, in accordance with 10 CFR 50.59(d).

On July 3, 2017, SCE&G approved Revision Notice (RN) 16-070, changing the Initial Test Program described in the VCSNS Units 2 & 3 Updated Final Safety Analysis Report (UFSAR) Subsection 14.2.9.1.11. This change was made to revise descriptions of the hydrogen control system instrumentation, so that the interface with the Class 1E power supply system was removed.

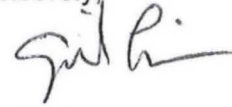

This departure from Tier 2 information in the UFSAR (which includes the plant-specific DCD) was evaluated in accordance with 10 CFR 52 Appendix D Section VIII, and it was determined that this change did not involve a change to Tier 1 information, Tier 2\* information, or the Technical Specifications. The evaluation also determined that prior NRC approval for this departure was not required.

This letter contains no regulatory commitments.
