Mr. Thomas E. Murley, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: Dresden Station Units 2 and 3  
DCRDR Schedule for Common Diesel  
Control and Indication Changes  
NRC Docket Nos. 50-237 and 50-249

References (a): Letter from J.A. Silady to T.E. Murley  
dated May 4, 1988 concerning Dresden  
DCRDR Modifications.

(b): Teleconference between CECO (J.A. Silady,  
R.E. Howard, et. al.) and NRR (B.L. Siegel,  
R.J. Eckenrode, J.P. Bongarra) on June 15,  
1988.

Dear Mr. Murley:

The Reference (b) conference call was held in support of your staff review of the Reference (a) proposed schedule change for several DCRDR related modifications. This letter documents the results of the Reference (b) discussion. The proposed schedule for the modifications concerning Human Engineering Discrepancies (HEDs) for the Common ("2/3") Diesel Generator control and indication was considered acceptable under the following conditions:

1. CECO will perform the Common Diesel modifications (HED Nos. 0346 and 0347) prior to the next Dresden 3 refueling outage if a scheduled mid-cycle outage of greater than two weeks duration is planned, provided that:
  - (a) There is sufficient lead time ( 3 to 4 weeks) from the scheduling of the outage to the shutdown date to allow necessary preparations; and
  - (b) All materials are available on-site. This will be the case within the next month.

PDR ADOCK 05000237  
P DCD

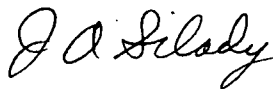

*Adopt*

2. No further schedule extensions will be considered for Dresden HED Nos. 0346 and 0347, i.e., this work must be completed prior to the restart from the Dresden 3 end of Cycle 11 outage.

As previously discussed with Mr. B.L. Siegel, it should also be noted that the table attached to Reference (a) contained typographical errors on the Annunciator Reflash item. A corrected version of the table is therefore attached which reflects the current schedules for both the Common Diesel and Annunciator Reflash items.

Please contact this office should further information be required.

Very truly yours,

J. A. Silady  
Nuclear Licensing Administrator

DRESDEN UNITS 2 and 3

DCRDR SCHEDULE

<u>Description</u>	<u>HED Index No.</u>	<u>Category</u>	<u>Mod. No.</u>	<u>Original Commitment *</u>	<u>Proposed Implementation *</u>
Common Unit Diesel	0346, 0347	IB	M12-2/3-86-04A	D3-1st Refueling Outage	D3-2nd Refueling Outage**
Control and Indication		IB	M12-2/3-86-04C	D3-1st Refueling Outage	D3-2nd Refueling Outage**
		IB	M12-2/3-86-04D	D3-1st Refueling Outage	D3-2nd Refueling Outage**
Annunciator Reflash	0343	2B	M12-2-86-22	D2-2nd Refueling Outage	D2-3rd Refueling Outage

\* Number of Refueling Outages following the DCRDR Submittal (May, 1985) excluding the D3 EOC9 Outage.

\*\* Will be performed earlier if material availability and a planned, mid-cycle outage of sufficient duration allows.
