

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D. C. 20555

August 2, 1988

Docket Nos.: 50-237/249  
50-254/265

Mr. Henry E. Bliss  
Nuclear Licensing Manager  
Commonwealth Edison Company  
P.O. Box 767  
Chicago, Illinois 60609

Dear Mr. Bliss:

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION RELATED TO FLUED HEAD ASSESSMENT PROGRAM AT DRESDEN STATION UNITS 2 AND 3 AND QUAD CITIES STATION UNITS 1 AND 2 (TAC NOS. 66160, 66161, 66162, AND 66163)

- References:
1. Letter from I. M. Johnson to Thomas E. Murley on Flued Head Assessment Program, dated June 6, 1988.
  2. Letter from Kamal Banydypadhyay to P. T. Kuo on Flued Head Anchor Design, dated February 10, 1988.
  3. Letter from I. M. Johnson to Thomas E. Murley on Continued Operation Criteria for LPCI Piping, dated June 9, 1988.

Your response to concerns raised by the staff in a teleconference between Commonwealth Edison Company (CECo) and the staff on May 12, 1988, regarding the Dresden and Quad Cities Flued Head Assessment Program, was provided in Reference 1. These concerns were originally raised by members of Brookhaven National Laboratories (BNL) during a January 26-28, 1988 NRC audit of the program (Reference 2).

Our consultants at BNL have reviewed CECo's response contained in Reference 1 and found that some of the staff's concerns are still not satisfactorily resolved. This latest evaluation by BNL is summarized in the enclosure and requires an additional CECo response in order for the staff to complete its review. Upon receipt of CECo's response the staff will conduct another audit of your program, particularly in the area of the calculations which were performed for the current reassessment.

The operability issue of the Dresden Unit 2 Low Pressure Core Injection (LPCI) piping is addressed in Reference 3. As you are aware, this issue is being reviewed together with the above flued head anchor program. The corresponding calculations of the LPCI piping will also be audited with the rest of the program.
