Subject: Dresden Station Units 2 and 3
 Supplement to Application for
 Amendment to Facility
 Operating Licenses DPR-19 and 25
 Appendix A, Technical Specifications
NRC Docket Nos. 50-237 and 249

Reference: Letter from G.L. DeYoung to T.E. Murley
 dated October 5, 1988

Dear Mr. Murley:

A proposed change was recently submitted to the NRC to remove the Commonwealth Edison Corporate and Station organization charts from the Technical Specifications for Dresden, LaSalle and Quad Cities Stations. However, the pages that were submitted for Dresden Station had been superseded by a subsequent amendment that was issued by the NRC. We are therefore resubmitting the corrected pages, summary of the changes, and description of proposed amendment request for Dresden Station. The Significant Hazards Consideration is unchanged.

Please direct any questions you may have regarding this matter to this office.

Very Truly Yours,

G.L. DeYoung
 Nuclear Licensing Engineer
