Response to NRC Generic Letter 88-14  
NRC Docket Nos. 50-237/249, 50-254/265, 50-295/304,  
50-373/374, 50-454/455, and 50-456/457

Reference: NRC Generic Letter 88-14, dated August 8, 1988.

Dear Sir:

The reference Generic Letter requested that all holders of operating licenses or construction permits for nuclear power reactors review NUREG-1275, Volume 2, and perform a design and operations verification of the instrument air system.

At this time, the instrument air system review is still in progress for all Commonwealth Edison nuclear stations. The status and schedule for each station is provided in Attachments A through F of this letter.

To the best of my knowledge and belief, the statements contained above are true and correct. In some respect these statements are not based on my personal knowledge, but obtained information furnished by other Commonwealth Edison employees, contractor employees, and consultants. Such information has been reviewed in accordance with company practice, and I believe it to be reliable.
